Submission date: 3/25/2024 4:10:50 PM

Due to interference of both food and plantation chain being interrupted, including possible health damage to both wildlife and residential living in proposal site including neighbouring suburbs, I believe this wind farm is in the wrong location for this environmental of climate change planning. I believe in planting and repairing of land with trees , farming etc is the long term solution ,other to a environmental catastrophe of used fibre class , cement and metals used to construct these machines that only have a short life span of operational affect in which won't adapt to these climate areas of the New England
