I am very much in support of the WSF project, as a renewable energy business based in Canberra the project will open up an opportunity for EPC Solar to participate in a utility scale project. As a majority Indigenous owned business we have set up a foundation called Kali Pathways that will enable Indigenous students and graduates to lock into full time employment in the renewable energy sector, as our business grows we have a target of creating 48 FTE positions by 2027.

Patty Mills is shareholder and brand ambassador of EPC Solar, we are working closely with Team Mills to build the foundation over the next 3 years.

Being involved with projects such as Wallaroo Solar Farm will allow us to create many more employment opportunities for Indigenous and non-Indigenous Australians.

Being situated so close to the West Belconnen Sub-station makes the site ideal for a solar farm.
