I object to this project as it is like every renewable project in NSW is taking up land that will produce food and fibre to feed and cloth our ever increasing population. There is plenty of areas in Canberra that could host solar and/wind, car parks around Parliament House!!!

In our area a lot of farmers are going to off grid power ,our two properties have been off grid for over twelve months now. Once been off grid you realise that renewable power is not that efficient as all the experts make it out to be, it's lucky we have a back up generator .
