Solar panels cannot be recycled or safely disposed of, Murrumbateman is at higher risk of extreme weather causing damage. This farm is only adding to the land fill and litter problem.

In a fire they release toxic fumes that can kill and/or hurt people and animals, we do not need that risk in rural areas.

They are an eye sore, do not benefit the public enough due to they inability to work at 100%.

We need the money spent on this farm to be redirected to fixing roads such as the main road leading into Yass from Murrumbateman side. Which reflects the sun blinding the driver and the pot holes are getting big enough to cause damage. I think that would be a better use of our money.
