*I must reject the proposal for a solar farm in Canberra due to my personal connection to the region and its natural beauty. Whenever I visit Canberra to see my family, one of my greatest joys is hiking and exploring the area's rich heritage and stunning natural landscapes. These experiences are invaluable to me, providing both a sense of peace and a way to connect with the history and environment of the region.*

*The introduction of a solar farm would significantly alter these landscapes, potentially disrupting the natural habitats and the serene beauty that make Canberra such a special place. While I recognize the importance of sustainable energy, I believe it is crucial to balance development with the preservation of our natural and cultural heritage. Protecting these areas ensures that future generations can continue to enjoy and appreciate the unique and irreplaceable environment that Canberra offers.*
