I am a highly affected neighbor to the proposed location. It ruins the rural outlook and sits next to heritage listed farmland. The ACT border walk would no longer be an attraction to the area and the urban open spaces directly adjacent in the ACT would be severely impacted by removing the rural outlook. I bought in this location exactly for the rural land around the area and this will no longer be here for everyone to enjoy.

I'm am in favour of renewables but this is the wrong location.
