I wish to express my concern as a local community member, that the proposed Wallarro Solar farm development, due to its large scale and location, will have profound serious impacts on all the large numbers of people who live near or visit this rural fringe area, with its growing tourism and recreational business.

I like so many others, have been unaware the scale how serious these impact could be.

1. Traffic Impacts.

High volume of Heavy Truck Traffic, which I understand will be 6 days/week on a narrow rural roads that will affect all road users and put lives at risk including School children, Cyclists, Walkers and Joggers, Sightseers, Tourists, and all road traffic

2. Risk of controlling Bush & Grass Fires, any fires the Solar plants themselves.

An I'm very concerned how such events could be controlled.

The Solar heat Island affect could significantly increase the risk of fires occurring.

3. Environmental impacts.

Decrease in biodiversity pased by large Solar farms.

4. Any hazardous material produced in construction and maintenance could pollute non regulated waterways that feed through this region and into the Murrumbidge.

5. Negative impact on local businesses including Wineries, Horse rideing and other tourism's in thiamine area.

Thankyou for reading my concerns and I hope you will please consider the vary real impacts of this chosen location.
