Topic 1. Sustainability of current and future forestry operations in NSW

I work in tourism - our forests are worth a lot more standing and intact than destroyed so a few people can make a buck. It's time to end this travesty of an 'industry'. And then there is the following which is spot on: I fully support an immediate end to native forest logging and a future industry based on sustainable plantations;

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway;

The true value of our native forests comes from their critical role in carbon storage, providing a clean and reliable water supply, providing critical habitat, recreation and spiritual connection.
