Topic 1. Sustainability of current and future forestry operations in NSW

Forestry should never take place in National Parks! They are refuges for our disappearing wildlife. Why governments keep making decisions to endanger these animals and birds, is beyond so many of us! Clear felling for housing estates is so wrong! For years, we are impacted by the resulting soil erosion. The RFS hazard reductions and their reasoning for it, is impacting our health. How much thought is given to our valuable ecosystems?
