Topic 1. Sustainability of current and future forestry operations in NSW

The logging of native old growth forests should be ended. Although 91% of our timber comes from plantations, of the old growth forest still logged, much of this still goes to woodchip- which is unacceptable.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Last week on an excursion for primary students to Bongil Bongil National park, the ranger told our students that it takes 100 years for a tree to become a habitat for other animals. That means our old forests are vital for varied species.
