Topic 1. Sustainability of current and future forestry operations in NSW

Please leave what is left. We have already taken so much, please keep the rest for future generations

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Instead of paying lip service to First Nations Peoples, can we not take notice of their history and stop destroying it? Again, we have taken so much. Can we please stop!

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

There is enough cleared land in Australia to grow the timber for these purposes. We need to get clever and stop taking from our wilderness.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Thank you!

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Listen to the Aboriginal Peoples. Ask them for advice.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Research is important but implementation is critical.
