Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

I fully support an immediate end to native forest logging and a future industry based on sustainable plantation.

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway.

The true value of our native forests does not come from wood production, but from their critical role in carbon storage, the water cycle, providing critical habitat, reducing fire risk, recreation and spiritual connection.
