Topic 1. Sustainability of current and future forestry operations in NSW

I believe that native forests in NSW have not been managed sustainably and that the logging of these forests is heavily subsidised.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

I recommend an immediate end to logging of native forests and a reliance of plantation timber but plantations should be established on land already cleared and not involve clearing of native forest or forest remnants.

I support an immediate end to logging of greater glider and Koala habitat and reservation of these lands in National Parks or Nature Reserves.

The greatest value of our remaining native forests lie in carbon capture and storage, catchment protection, biodiversity conservation and recreation.
