I wish speak on the issue of using Solar Panels coming from China, with nearly 45% of the polysilicon mined and the panels made in China, it is highly likely that it would tainted by Uyghur Slave Labour. There is credible evidence of Atrocities Committed against the Uyghurs in the its UNHRC - High Commissioner's report in 2022, which amounts to Genocide, and is still being debated in the UN Human Rights Council. With the Australian Governments Modern Slavery Act, it is imperative that our local governments and industries do not purchase and buy these solar panels.

I wish to speak at the hearing.
