This proposal is located within a beautiful rural environment, which attracts a large number of tourists and visitors. It is the wrong location for such a facility. It would ruin the local area for residents, existing businesses and farms, and visitors. High volumes of extra heavy transport would overrun already poor roads and provide extra traffic, and destroy the lovely local ambience and amenity. The nature of treatment stands to disaffect delicate ecological balances for wildlife and water.

It is extremely alarming that this proposed development has not been rejected already on the basis of community concern about these issues.
