I am appalled that the Plasrefine development was ever even considered for development in the Southern Highlands area. This is an area noted & celebrated for it's natural beauty, environmental diversity & country-feel. This horrendous development will forever change the social and environmental fabric of the highlands. A corrupt & fraudulent foreign citizen stands to make a large profit and the expense of the Australian environment, and Australian families. This facility will forever be a blight on the New South Wales landscape. I would have thought that a Labor government would be more inclined to deny such damaging overseas investment and am disgusted that planning has proceeded unabated, despite overwhelming, community & council opposition. It should be noted that I am in favour of increased development in the highlands- schools, preschools, restaurants, cafes, shops, playgrounds, sporting facilities etc. These are all vital in response to the increasing population of the highlands. This abhorrent plastics recycling facility will bring no benefits to the highlands communities, only disease and damage.

Sincerely,

Henry Halley
