Subject: Support for State Significant Development Application – Plasrefine Recycling Pty Ltd in Moss Vale, NSW

Dear Council Members,

I am writing to express my strong support for the development application submitted by Plasrefine Recycling Pty Ltd for a new recycling facility in Moss Vale, NSW. This project represents an important opportunity for our community and region, aligning with both economic and environmental priorities for the future.

The proposed development will have a capital investment value of \$88,120,922 and is expected to generate up to 200 jobs during construction and an additional 140 permanent jobs during operations. This significant job creation will provide employment opportunities for residents, increase local spending, and stimulate economic growth across Moss Vale and surrounding areas. In addition to the economic benefits, the facility will offer key environmental advantages, including the ability to recycle up to 120,000 tonnes of mixed plastic waste annually. As global environmental challenges intensify, projects such as this are essential to reduce plastic waste and promote sustainable waste management.

The company has also committed to using solar energy to power the facility, ensuring it operates as a zero-emission facility. This environmentally conscious approach makes the facility a model of sustainable development, aligning with local and state government goals to reduce carbon emissions and meet the environmental needs of future generations.

I believe that Plasrefine Recycling Pty Ltd's proposal aligns with the strategic objectives of the Council, the NSW Government's environmental policies, and the community's long-term interests. This project will position Moss Vale as a forward-thinking regional hub that balances growth with sustainability. I respectfully urge the Council to support this state significant development.

Alignment with state and local environmental strategies by promoting sustainable development. I am confident that this project will deliver lasting economic and environmental benefits to Moss Vale and NSW as a whole.

Thank you for your consideration of this submission, and I look forward to the successful approval of this important development.

Yours sincerely,

Tony Li
