As a member of the Highlands community I strongly object to this development.

The plastic plant will be far too close to local housing with very little buffer zone.

The traffic in the Moss Vale area is already very heavy during peak periods of the day and truck and other vehicle movements to and from the plant will make this situation even worse.

Traffic to and from the plant will be using roads not designed for heavy vehicles.

Contamination to the air and water is not acceptable. Water contaminated by the plant will flow into the Sydney catchment areas and affect drinking water supplies.

I'm sure most Australians support recycling but the plants must be built away from small towns which are tourist hot spots.

Please do not permit this proposal to proceed.
