I object to the proposed development to build a plastics recycling facility because of the environmental affects this will have on our local community, by releasing toxins into the local environment and our waterways extending to the Sydney region. It is incomprehensible that a facility like this could be considered for approval within a community full of young families as well as the elderly. It is preposterous that this proposal could possibly be considered for approval given the proximity to major townships. This simply cannot be approved under any circumstance as this has a direct and significant health and wellbeing impact on the members of our local and surrounding community.
