Submission date: 10/23/2024 4:54:30 PM

I object for several reasons. The emissions of toxic micro plastics & odour will be spread the Southern Highlands. These will degrade our air, land, waterways & eventually quality of life, health, tourism & animals including wildlife habitats (local Platypus) will all be negatively impacted. The location has no buffer zone backing onto residents gardens. Our roads & traffic will directly impact infrastructure, residents & schools. There has been no transparency over the past 4 years & information regarding plant size, stack numbers & height, toxins released, water usage, size of machinery, transport requirements have proven difficult if not impossible to obtain.

If there occurs a very possible plastics fire from storage (well known world wide) there is no local force to fight such an incident. There has been an offer to find Pastefine an alternate location which has been refused. The Applicant has made a political donation to our government. It is clear from the past 4 years our voices are not being heard. PLEASE HEAR US -THIS IS NOT THE RIGHT LOCATION.
