A plant such as this should not be located anywhere near housing. This plant will significantly lower my property value, who is going to reimburse me for the reduction of my property value?

No plant such as this could ever have zero emissions of toxic air and effluent. Why do my children have to grow up being exposed to these chemicals? Move it somewhere not near housing, or if the NSW government thinks it's ok to be near housing and so important. [REDACTED] should be happy to have it built next to his house and until he has one next to his house. I don't want one anywhere near mine.
