To whom it may concern,

I have serious concerns about very real impacts that the Plasrefine proposal will have on the environment, water quality (for locals and for Sydney Water), and general health and safety for the following reasons:

The effect on:

air quality €" due to by micro-plastics & chemicals

waterways €" as the site sits on 2 riparian zones

roads & traffic €" with trucks operating 12-hour days

visual amenity €" with no buffer zone to residences

future development €" in the SH Innovation Park

*With the proposed site just 2km from Moss Vale town centre €" alongside residential streets, where creeks feed into Sydney's water supply €" Plasrefine Recycling, a company with no history in Australia, intends to build and operate the nation's largest plastics reprocessing facility. How can we have trust in Plasrefine when one of its technical directors, according to The Sydney Morning Herald, has been involved in overseas companies that were censured by ****'s Environmental & Ecological Bureau.*

For these reasons I oppose this project and development on the basis that this is not the correct or safe site for such a facility, and not enough is known about chemicals being used or indeed the reliability of this company to meet basic safety measures.
