Submission ID: 207440

Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic</i>
Location: New South Wales 2577	
Attachment: N/A	

Submission date: 10/24/2024 1:27:04 PM

*I believe that Moss Vale is not the right site for Plasrefine. The effects of this project will be devastating.*

*1. Toxic environment ; water ,air, land contaminated.*

*Important to note that the Wingecarribee area is a catchment area for Warragamba Dam which in turn supplies Sydney.*

*Much information is currently coming to light about microplastics. A project this large in a delicate ecosystem will result in a huge volume of microplastics being washed into the water systems.*

*2. Health of the people of Wingecarribee area and the population of Sydney downstream from Moss Vale. Microplastics have no boundaries.*

*3. Wildlife. The animals of the area will be affected.*

*4. Farm animals including cattle and horses.*

*5. Tourism and wine industries .No-one will come to an area that has a huge factory ,that is both highly toxic and ugly.*

*6. Health retreats as well as tourist accommodation. No-one will come to a place that isn't healthy.*

*7. Industrial accidents with potential for serious hazardous fires and spillages into the river system.*

*8. Infrastructure. The roads that are already filled with potholes will deteriorate even further.*

*The Southern Highlands is a unique area with cultural, historical environmental and economic significance. This will be devastated by the proposed facility.*

*Please do not let Plasrefine be built in the Southern Highlands.*
