*I object to the proposed site for the Plas Refine facility. My main objections are on the basis of health and environmental concerns. I'm concerned that toxic micro plastics will be released into our local environment and impact our communities overall health and well-being; affecting our air quality, impact our wildlife, waterways, increased traffic due to the number of trucks that will be operating amongst many other concerns.*

*My own home is in a direct line from the facility and with the main direction that the wind blows and I have grave concerns that it will very much impact my own and my family's health and safety. Micro plastics will be directly blown over my home and those of my neighbours they will impact our air quality they will adhere to every living and non living surface and cause an untold litany of health issues. I particularly worry about the ingestion of these chemicals via our water supply and going about our daily lives.*

*I have already filled out a lengthy objection a couple of years ago.*

*It is clear to me that this is the wrong area to be considered for this type of industry.*

*I absolutely say NO to Plas Refine in the southern highlands.*
