*This is simply the wrong position for an industry of this type. Why?*

- Hazardous industry with fire risks; Moss Vale and surrounding villages do not have the fire fighting facilities to handle this*
  - Traffic hazard; if anyone involved in the approval has driven around the streets? They would have seen, up to 200 trucks 7 days a week will be impossible on the narrow pot hole ridden streets; they will put children at risk on these suburban streets, cause even more traffic hold ups and destroy the roads even further*
  - Health hazard; many scientific studies proving the risks to the communities health with microplastics have already been submitted*
  - NOT THE RIGHT SITE it simply doesn't work here in the middle of suberbia, other sites have been offered, sites that don't cause all these problems, so why try and shoe horn it into the most inappropriate site they could possibly find?*
-
