Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: New South Wales 2577	
Attachment: N/A	

Submission date: 10/22/2024 10:50:19 AM

The Plasrefine facility planned for Moss Vale is completely unsuitable for the site and for the district. My reasons for protesting this facility are:

The visual aspects of building such a huge facility with 14 metre high stacks

The unsuitability of the roads for the amount of heavy traffic proposed

The pollution: air, noise, water and visual that the facility will inflict on the community

Impacts to the drinking water for local and Sydney residents

The geographical unsuitability of the site being subject to the strong westerly winds prevalent in the district

The poor accuracy demonstrated in the submission eg stating that the Wingecarribee River will flow backward into the Wingecarribee

reservoir when it flows towards Sydney's main water source Warragamba Dam.

The amount of power and water the facility will use to the detriment of other local business and users.

The Plasrefine site is totally unsuitable, it will change the character of Moss Vale, Burradoo, Bowral and Mittagong. Place the residents at risk from the ultra-fine powder the waste is refined into which will almost inevitably find its way into the environment and impact on our quality of life in many negative ways.

Please make the right decision and prevent this wholly unsuitable project from going ahead.

Sincerely,

Paul Roodenrys.
