I am writing to object to this development. I live and work in Moss Vale town centre with my family, including 2 young children who attend school and daycare in close proximity to the proposed plasrefine development. I am very concerned about the health risks of such a huge industrial development and the risk of microplastics being increased in our local community, without a clear sense the health of the community is being considered or protected. As a resident, I am also concerned about such a massive development in our region that relies on tourism due to its charm and character. The development risks damaging the community and health of residents. I don't believe proper consideration has been taken for its location and operation and the development should not go ahead.
