This proposal is completely out of character with the local area. This is predominantly a rural location that does not have the transport infrastructure to support such a project. Our roads are already in a terrible state, an issue known to the local council. Moss Vale, without a bypass, is not set up to accommodate the heavy levels of traffic it already receives. The increased number of vehicles on the road as a result of this development, transporting the plastic to and from the proposed facility, will not only add further congestion to the already busy roads surrounding Moss Vale, but will further degrade the quality of our roads.

This facility will have little impact on the local economy. The majority of the plastic waste will come from the larger metropolitan areas of NSW. We are a small, rural community who will be adversely affected by this proposal. This is the Federal Government dumping it's waste on a rural location. Build this up in Sydney where most of the waste will be generated!
