It would be absolutely sickening if it goes ahead - the most destructive microplastics pollution in our air and waterways.

We'll all be breathing and drinking them for years to come.

I don't usually get involved in these sorts of things but this is seriously bad.

Our kids health will be affected - microplastics accumulate in every organ, especially the brain.

The flooding risk of floodwaters carrying plastics / microplastic waste into a major drinking water catchment alone makes this site unsuitable for the proposal
