I absolutely object to the planned Plasrefine industry being developed at the proposed site due to its long term affect of massive air and water pollution toxic to both human, plant and animal health, its proposed site being detrimental to nearby residents and animals (native and domestic) of planned and existing housing developments, the continual damage to local, already compromised roads, inadequate and inappropriate toxic waste disposal, lack of suitable fire fighting facilities especially for plastics. Water should not be used in such cases but foam or dry powder extinguishers are suitable, hence resulting in additional pollution to local waterways.

I am pleading to the IPC to not allow this proposed development to go ahead at the current proposed site!
