*I wish to express my objection to the proposed Plastics Refining plant in Moss Vale, for the following reasons.*

*It is of great concern to me that the main regulatory bodies that would normally be notified and involved in this kind of venture have not been contacted; something they describe as 'extraordinary' in the circumstances. This seems very suspect.*

*The building of a five story industrial facility amidst residential dwellings would not normally be approved or seen as desirable, particularly when it involves a considerable increase in heavy vehicles coming and going. Moss Vale is already really struggling with the traffic it has, and does not have the infrastructure to cope with this.*

*The involvement and inaccessibility of a key individual who has a history of being [REDACTED] [REDACTED] poor environmental practices raises an obvious red flag. The proximity of the site to a water catchment area of serious significance to a large population should mean only an operator or company with a proven record of best practice could be considered.*

*The people proposing this are not being transparent or open - it is simply not intelligent to ignore the obvious problems and unknowns.*

*It's a desperately needed resource - but it needs to be in a place that can't impact detrimentally on waterways or residents, and needs to be run by people who can be fully accountable.*

*Thank you.*
