****Subject: Please Don't Build the Plasrefine Facility in Moss Vale****

Hi, my name is [REDACTED] and I go to [REDACTED] which is just 4.5kms away across the fields from the proposed Plasrefine site. I'm 12 years old, and I really care about my town and the environment around it. I think building the Plasrefine facility here is a bad idea, and I hope you'll understand why.

****Our Nature Will Be Ruined****

The Southern Highlands is such a beautiful place with trees, rivers, and animals. I love living here because it's clean and green. But if a big plastic processing facility is built, it could pollute our water and soil. Imagine if waste or chemicals leaked into our rivers " it would be terrible for animals, farms, and even us kids who live here.

****Breathing Polluted Air****

I'm worried about what I'll be breathing if this facility opens. Plastic refining can release all sorts of chemicals, and I don't want to breathe that in. A lot of kids in my school have asthma, and breathing bad air could make them sicker. I've heard pollution is especially harmful to young people, so it feels really unfair to put that risk right near our school.

****Too Much Traffic and Noise****

Moss Vale is a quiet town, and I love that about it. But if this facility is built, we'd get a lot more trucks and heavy vehicles passing through. This means more noise, which would disrupt the local neighborhood. Plus, big trucks can make our roads less safe, and that's scary for people walking, riding bikes, or even driving.

****Changing Our Town****

Moss Vale has always been special to me because it's a calm, friendly town with beautiful nature. Building a huge industrial facility could make people not want to visit anymore, and I don't think that's fair to local businesses or families who've lived here forever.

I'm asking you to please think about how this will affect the kids and families here. We want Moss Vale to stay a healthy, safe place where we can grow up.
