I'm a Moss Vale resident with 2 children attending school and playing sport in the area and I am concerned about health impacts of this development, and its ability to impact air quality and water quality and flow on effects on the short term and long term health of the young people growing up in the area. As a health scientist, I'm aware that research takes time to catch up to new technologies and industries and this does not appear to be the right site to test the long-term health impacts of plastic recycling technologies which involve a certain degree of leakage of microplastics into the environment.
