Submission in opposition to the Moss Vale Plastics Recycling Facility

I object to the proposed Moss Vale Plastics Recycling Facility on the following grounds:

1. *The reason I'm writing here is because of the increased risks specifically to our babies and children, due to their unique physiological differences, higher exposures per unit of body weight and longer life expectancies/accumulated exposure risk over time. Plastic hazardous exposures have also been linked to increased risks of miscarriage, prematurity, stillbirth, low birth weight and birth defects, neurodevelopmental impairments, impaired lung growth and childhood cancers.*

2. *Not the right site*

The proposed location for the facility:

â€¢ *is within 150m of residential properties;*

â€¢ *lacks a buffer zone with a medical research facility, two schools and a childcare centre;*

â€¢ *is in a zone of the Goulburn and Sydney's drinking water catchment;*

â€¢ *lacks appropriate transport infrastructure to ensure a safe transport route for trucks; and*

â€¢ *is not zoned as a heavy industrial zone.*

3. *Impossible to manage fire risk at this location. In the event of a fire, Plasrefine proposes to use local crews at Moss Vale, Bowral and Mittagong. Only Mittagong has a hazmat truck!*
