My objection is based on concerns regarding the impact this facility will have on our area.

I realise that the recycling of plastics is an important issue and a facility is needed to cope with the huge amount of plastic products in our country.

The proposed site in Moss Vale is not the location for such a facility. It is a poorly thought out proposal and I have to wonder how this has even come to be?

The impact on our natural waterways must be of the highest importance. Together with the effects on the residential area where it is planned to be constructed. Surely there is another more suitable site with less impacts on water and the well being of residents?

The traffic that will be generated is another huge concern, and it will be heavy traffic. The town of Moss Vale and the roads are already under pressure and struggle with the volume of traffic as it now stands. Additionally, Ashgrove Estate will be constructing houses imminently, so an increased volume of traffic is looming.

I feel my concerns are real and I honestly hope that more thought is given to this poorly thought out proposal. It is not a case of 'not in my backyard' as I realise a facility is necessary. But a more suitable and less invasive site needs to be found.
