Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Other issues</i>
Location: Redacted	
Attachment: N/A	

Submission date: 10/30/2024 1:22:13 PM

Micro Plastics are causing cancer, illness and birth defects. Having a processing plant in the local area will not only put micro plastics into the air and surrounding land but into our waterways.

This will affect the health and wellbeing of humans, animals and plant life alike.

This cannot go ahead.
