Dear Community Leaders and Neighbours,

I live in Moss Vale, and I love our beautiful town. I am writing to you because I am very worried about the new factory that is going to be built here. I hope you will listen to me and understand why we don't want it to happen.

First of all, Moss Vale is a special place. We have clean air, green parks, and lots of animals. I love playing outside with my friends, riding my bike, and exploring nature. If the factory is built, it will bring a lot of pollution. The air will not be as clean, and it will be harder to breathe. I don't want to see our parks and playgrounds covered in dust and smoke.

Secondly, the factory will be very noisy. It will run all day and night, and the sound of machines and trucks will be everywhere. How can we sleep or study with all that noise? I am worried that it will be too loud for us to enjoy our homes and our school. We need peace and quiet to grow up healthy and happy.

Also, the factory will bring a lot of traffic. Big trucks will be driving through our streets, making it dangerous for us to walk or ride our bikes. I am scared that someone might get hurt. Our roads are not made for so many heavy vehicles, and it will make our town crowded and unsafe.

Another important reason is the impact on our water. Factories use a lot of water and can pollute our rivers and lakes. We need clean water to drink, for our gardens, and for the animals. If the factory pollutes our water, it will be harmful to everyone in Moss Vale.

Moreover, the factory could hurt local businesses. Our town has many small shops and family-owned businesses that might suffer because of the factory. People might not want to visit Moss Vale if it becomes too industrial. This could mean fewer jobs and less money for our community.

Additionally, the factory might not be safe. Accidents can happen, and if there is a fire or a chemical spill, it could be very dangerous for everyone. We don't want to live in fear of something bad happening.

Lastly, I care about the animals that live here. The factory will destroy their homes and make it hard for them to survive. I love seeing birds, kangaroos, and other animals around Moss Vale. They are part of what makes our town special. If the factory is built, many of them will have to leave or might even die.

I know that recycling is important, but I believe there are better places for this factory. It should not be built so close to where people live and play. Please think about the children and the future of Moss Vale. We want to grow up in a safe, clean, and happy town.

Thank you for listening to me. I hope you will help us keep Moss Vale the wonderful place it is.

Sincerely,

A community member
