This will be the 4th time I have made a submission through multiple platforms over the last 2 years, it seems like this process leverages the fact that people are busy and that perhaps objections would drop off given people just get annoyed that they need to keep repeating this process and not withstanding that the meeting last monday had great attendance I feel having a public meeting on a monday during work hours during a time of economic down turn when people need to work more was a fair time to have the meeting , I feel this whole process has be in plasrefines favour - for the reason I am objecting is all of the above listed reasons, I came to live in the country for a cleaner, peaceful, local life without big cooperations that want to profit from the land and pollute it, sending there profits back to countries outside Australia - its not the right site
