I object strongly to the proposed establishment of this kind of industrial activity in the rural and residential area of Moss Vale and surrounds. There is no place for such an activity so close to residential and rural areas that have been in place for many, decades. I share serious concerns on the grounds of air quality (due to by micro-plastics & chemicals), spoilage of waterways

(as the site sits on 2 riparian zones),

negative impacts to local roads & traffic

(with trucks operating 12-hour days), reduced visual amenity

with no buffer zone to residences and unanswered questions as to possible

future development of this facility and/or others it may open the door to in the Highlands.

Please note my strenuous objection to this proposal.

Yours sincerely

Stephen Lennon
