As a long time resident of the Southern Highlands I am devastated at what this proposal holds for our future in terms how it will affect our children, grandchildren, the surrounding environment, wild life, grazing animals, food chain and of course our waterways and catchments.

Let's not even start on the amount of trucks that will use our roads which are most certainly not up for the task, one every 7 minutes at that!

I feel like our region has become a dumping ground for very bad ideas and that we are being bullied into accepting our fate when it comes to state government planning because we are in relative close proximity to Sydney and we have at least some infrastructure in place. However we are far enough away to be out of sight and out of mind!

Let me ask those decision makers if they would be happy to have this factory metres from their or their loved ones homes? My guess would be a resounding NO!!

Can you one hundred per cent guarantee there will be zero emissions of micro plastics or any other harmful toxic chemicals?

This company has already been reprimanded in its country of origin for poor environmental practices, what more evidence is needed to prove this proposal should NOT go ahead.

I don't think it could be any clearer that our community does NOT want or need such a development in our beautiful Southern Highlands area.

It is so inappropriate that it's almost laughable except it's not.

Please listen to our community and put a halt to this horrendous proposal and development for the sake of future generations.
