As a member of the local community that this development directly benefits I want to submit a voice of reason in support to show local people CAN see the benefits that it will bring directly and indirectly.

The submission has addressed traffic movements directly onto the main highway and should not impact local residents which is a good thing

I support the direct employment that this will bring, which is desperately needed

I support the wide and varied indirect employment that this will bring to the area

I do not agree with what the militant action groups have submitted, which appears to be making unfounded, fear mongering statements lacking fact and substance.

I support that the rock products will directly benefit the local area which is increasing becoming difficult to source due to the large quarries feeding their rock into the sydney market.
