

Development Consent

Section 89E of the *Environmental Planning and Assessment Act 1979*

As delegate of the Minister for Planning, I approve the development application referred to in Schedule 1, subject to the conditions in Schedules 2 to 5.

These conditions are required to:

- prevent, minimise, and/or offset adverse environmental impacts;
- set standards and performance measures for acceptable environmental performance;
- require regular monitoring and reporting; and
- provide for the ongoing environmental management of the development.

Oliver Holm
Executive Director
Resource Assessments & Compliance

Sydney

Signed 29 September 2015

SCHEDULE 1

Application Number:	SSD-5145
Applicant:	Centennial Northern Coal Services Pty Limited
Consent Authority:	Minister for Planning
Land:	See Appendix 1
Development:	Northern Coal Services Project

The Department has prepared a consolidated version of the consent which is intended to include all modifications to the original determination instrument.

The consolidated version of the consent has been prepared by the Department with all due care. This consolidated version is intended to aid the consent holder by combining all consents relating to the original determination instrument but it does not relieve a consent holder of its obligation to be aware of and fully comply with all consent obligations as they are set out in the legal instruments, including the original determination instrument and all subsequent modification instruments.

CONSOLIDATED CONSENT

SUMMARY OF MODIFICATIONS

Application Number	Determination Date	Decider	Modification Description
SSD-5145 MOD 1	25 January 2018	Director Resource Assessments	Increase employees and amend noise and air quality criteria
SSD-5145 MOD 2	Withdrawn		
SSD-5145 MOD 3	25 November 2022	Director - Resource Assessments	Rehabilitation reforms
SSD-5145 MOD 5	2025	Independent Planning Commission	Transport of coal washery reject and operation of mobile crushing and screening plant

CONSOLIDATED CONSENT

DEFINITIONS

Annual review Applicant	The review of operations required by Condition 11 of Schedule 5 Centennial Northern Coal Services Pty Limited, or any other person or persons who rely on this consent to carry out the development that is subject to this consent
ARI	Annual recurrence interval
BCA	Building Code of Australia
Built features	Includes any building or work erected or constructed on land, including dwellings, outbuildings and infrastructure such as any formed road, street, path, walk, or driveway and any pipeline, water, sewer, telephone, gas or other service main
CCC	Community Consultative Committee
CES	Cooranbong Entry Site, as shown in Figure 2 of Appendix 2
CPHR	Conservation Programs, Heritage and Regulation Group
CPP	Coal preparation plant
Conditions of this consent	Conditions contained in Schedules 2 to 5 inclusive
Coal transportation and processing operations	Includes the following, where carried out on the site: <ul style="list-style-type: none"> • processing, handling and storage of coal; • transportation of coal by private haul road, conveyor or rail; and • transportation and emplacement of coal rejects and tailings
Construction activities	The construction works at the CES and NCSS, including construction of coal stockpiles, the CPP, piping of LT Creek, pollution control works and automation of coal handling facilities as described in the EIS
CPI	Consumer Price Index, as published by the Australian Bureau of Statistics
CWR	Coal washery reject as defined under the <i>Coal Washery Rejects Order & Exemption 2014</i> (EPA, 2014)
DA 73-11-98	Development consent for the Newstan Colliery Lease Extension Area, granted on 14 May 1999, as since modified
DA 97/800	Development consent for the Mandalong Mine, granted on 14 October 1998, as since modified
Day	The period from 7.00 am to 6.00 pm on Monday to Saturday, and 8.00 am to 6.00 pm on Sundays and Public Holidays
Department	Department of Planning, Housing and Infrastructure
Development	The development described in the EIS
DPE Water	Water Group, within the Department
DPI	Department of Primary Industries
EIS	Project application SSD-5145 and supporting documentation, including Environmental Impact Statement titled <i>Northern Coal Logistics Project Environmental Impact Statement</i> , dated September 2014; associated response to issues raised in submissions, titled <i>Northern Coal Logistics Project Response to Submissions</i> , dated February 2015; and additional information regarding residual concerns, titled <i>Mandalong Southern Extension Project Response to RTS Report</i> , dated April 2015, as amended by: <ul style="list-style-type: none"> • Modification application SSD-5145 MOD 1 and supporting documentation, including Statement of Environmental Effects titled ‘<i>Northern Coal Logistics Project Development Consent SSD-5145 Section 96(1A) Modification Statement of Environmental Effects</i>’ dated October 2017, and the Response to Submissions titled <i>RE: SSD-5145 MOD 1 Response to Submissions Letter Report</i> dated 15 December 2017, all prepared by Centennial Coal Company Ltd • Modification application SSD-5145 MOD 3 and supporting documentation, including Modification Report titled ‘<i>Centennial Administrative Modification to Align Development Consent Conditions with Contemporary Requirements under the Mining Act 1992</i>’ (dated 22 August 2022). • Modification application SSD-5145 MOD 5 and supporting documentation, including Modification Report titled ‘<i>Modification Report for Modification 5 to SSD-5145 (MOD5)</i>’ dated September 2024; the Response to Submissions titled ‘<i>SSD-5145 Modification 5 Response to Submissions Report</i>’ dated December 2024; and additional information dated 17 April 2025.
EPA	Environment Protection Authority
EP&A Act	<i>Environmental Planning and Assessment Act 1979</i>
EP&A Regulation	<i>Environmental Planning and Assessment Regulation 2021</i>
EPL	Environment Protection Licence issued under the POEO Act
NSW Government	
Department of Planning & Environment	

Evening	The period from 6.00 pm to 10.00 pm
Feasible	Feasible relates to engineering considerations and what is practical to build or to implement
Ha	Hectare
Heritage item	An item as defined under the <i>Heritage Act 1977</i> and/or an Aboriginal object or Aboriginal place as defined under the <i>National Parks and Wildlife Act 1974</i>
Heritage NSW	Heritage NSW, within the Department
HLLS	Hunter Local Land Services
Incident	A set of circumstances that: <ul style="list-style-type: none"> causes or threatens to cause material harm to the environment; and/or breaches or exceeds the limits or performance measures/criteria in this consent
Land	As defined in the EP&A Act, except for where the term is used in the noise and air quality conditions in Schedules 3 and 4 of this consent where it is defined to mean the whole of a lot, or contiguous lots owned by the same landowner, in a current plan registered at the Land Titles Office at the date of this consent
LMCC	Lake Macquarie City Council
Material harm to the environment	Actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial
Minister	Minister for Planning, or delegate
Mitigation	Activities associated with reducing the impacts of the development prior to or during those impacts occurring
Morning shoulder period	The period from 6am to 7am, Monday to Saturday, and 6am to 8am on Sunday and Public Holidays
NCSS	Newstan Colliery Surface Site as shown in Figure 3 of Appendix 2
Night	The period from 10pm to 7am on Monday to Saturday, and 10.00 pm to 8.00 am on Sundays and Public Holidays. Where a Morning Shoulder period applies, the Night period reduces to the period from 10pm to 6am
POEO Act	<i>Protection of the Environment Operations Act 1997</i>
Privately-owned land	Land that is not owned by a public agency or a mining or power generation company (or its subsidiary)
Product coal	Saleable coal transported from the site, whether processed or unprocessed
Reasonable	Reasonable relates to the application of judgement in arriving at a decision, taking into account: mitigation benefits, cost of mitigation versus benefits provided, community views and the nature and extent of potential improvements
Registered Aboriginal Parties	Aboriginal community stakeholders listed in Table 1 of Appendix 5
Rehabilitation	The restoration of land disturbed by the development to a good condition to ensure it is safe, stable and non-polluting
Remediation	Activities associated with partially or fully repairing or rehabilitating the impacts of the development or controlling the environmental consequences of this impact
Resources Regulator	NSW Resources Regulator
ROM coal	Run-of-mine coal
SANSW	Subsidence Advisory NSW
Secretary	The Secretary of the Department, or nominee
Site	All land to which the development application applies as listed in Appendix 1 and shown in Appendix 2
Statement of Commitments	The Applicant's commitments, as set out in the EIS, and shown in Appendix 6

SCHEDULE 2 ADMINISTRATIVE CONDITIONS

OBLIGATION TO MINIMISE HARM TO THE ENVIRONMENT

1. In addition to meeting the specific performance measures and criteria established under this consent, the Applicant **must** implement all reasonable and feasible measures to prevent and/or minimise any **material** harm to the environment that may result from the construction, operation, or rehabilitation of the development.

TERMS OF CONSENT

2. The Applicant **must** carry out the development:
 - (a) generally in accordance with the EIS;
 - (b) in accordance with the Development Layout and Statement of Commitments; and
 - (c) in accordance with the conditions of this consent.

Note: The Development Layout is shown in the figures in Appendix 2.
3. If there is any inconsistency between the **documents identified in condition 2(a)**, the more recent document shall prevail to the extent of the inconsistency. However, the conditions of this consent shall prevail to the extent of any inconsistency.
4. **The Applicant must comply with any reasonable requirement/s of the Secretary arising from the Department's assessment of:**
 - (a) **any strategies, plans, programs, reviews, audits, reports or correspondence submitted in accordance with this consent (including any stages of these documents);**
 - (b) **any reviews, reports or audits commissioned by the Department regarding compliance with this consent; and**
 - (c) **the implementation of any actions or measures contained in these documents.**

LIMITS ON CONSENT

Coal Transportation and Processing Operations

5. The Applicant may carry out coal transportation and processing operations on the site until 31 December 2045.

Note: Under this consent, the Applicant is required to decommission and rehabilitate the site and carry out other requirements. Consequently, this consent will continue to apply in all respects other than to permit the carrying out of coal transportation and processing operations until the rehabilitation of the site and other requirements have been carried out to the required standard.
6. In any calendar year, the Applicant **must** not:
 - (a) receive, handle or process more than 8 million tonnes of ROM coal at the NCSS site;
 - (b) transport more than 6 million tonnes of ROM coal from the CES to the NCSS;
 - (c) transport more than 6 million tonnes of ROM coal from the CES to Eraring Power Station;
 - (d) receive more than 4.5 million tonnes of ROM coal from Newstan Colliery at the NCSS;
 - (e) transport more than 0.88 million tonnes of ROM coal from Awaba Colliery to the NCSS;
 - (f) transport more than 4.5 million tonnes of product coal from the NCSS to Eraring Power Station **and/or the CES;**
 - (g) transport more than **1 million tonnes of product coal (middlings) from NCSS to CES, of which at least 90% of 0.5 million tonnes is to be transported via back haulage;** and
 - (h) transport more than 8 million tonnes of product coal from the NCSS by rail.
7. The Applicant **must** not despatch more than 8 trains from the site in any day.
8. Prior to transporting more than 5.5 million tonnes of coal by rail in any calendar year, the Applicant **must** construct the automated coal recovery and train loading system as proposed in the EIS, to the satisfaction of the Secretary. Following its construction, the Applicant **must** use the automated coal recovery and train loading system for all transport of coal by rail.

CWR Transportation and Processing Operations

- 8A. The Applicant must transport CWR from the NCSS site:
 - (a) to the EPS on the private haulage road:
 - with at least 90% to be via back haulage only;
 - to a maximum of 500,000 tonnes in any calendar year;
 - (b) to external customers on the designated transport route:

- to a maximum of 250,000 tonnes in any calendar year;
- to a maximum of 2,000 tonnes per day; and
- using a maximum of:
 - 16 two-way truck movements (8 inbound / 8 outbound) during the AM peak period between 8:15am – 9:15am;
 - 6 two-way truck movements (3 inbound / 3 outbound) during the PM peak period between 3:45pm – 4:45pm;
 - 26 two-way truck movements (13 inbound / 13 outbound) per hour outside of the AM and PM peak periods.

Note: The private haulage road and designated transport route to be utilised for the transportation of CWR to external customers is shown in figure in Appendix 2A.

- 8B. The Applicant must comply with all the requirements of the *Coal Washery Rejects Order & Exemption 2014* (EPA, 2014) (including any update or revision of this order) prior to supplying any CWR to external customers.

Mobile Crushing and Screening Operations

- 8C. The Applicant must restrict mobile crushing and screening operations at the NCSS site to:
- the locations shown in the figure in Appendix 2B; and
 - no more than 20 weeks in any calendar year.

Hours of Operation

9. The Applicant **must** comply with the operating hours in Table 1.

Table 1: Operating hours

Activity	Operating Hours
Coal transportation and processing operations; maintenance activities	24 hours a day, 7 days per week
Construction activities	7.00 am to 6.00 pm on Monday to Friday, and 8.00 am to 1.00 pm on Saturday, with no construction activities on Sunday or on public holidays
Mobile crushing and screening operations	7.00 am to 5.00 pm on Monday to Saturday, and 8.00 am to 5.00 pm on Sunday and public holidays

Note: This condition does not apply in the event of a direction from police or other relevant authority for safety or emergency reasons regarding works which may need to be undertaken to avoid loss of life, property loss and/or to prevent environmental harm.

STRUCTURAL ADEQUACY

10. The Applicant **must** ensure that all new buildings and structures, and any alterations or additions to existing buildings and structures that are part of the development, are constructed in accordance with:
- the relevant requirements of the BCA; and
 - any additional requirements of the [SANSW](#), where the building or structure is located on land within a declared Mine Subsidence District.

Notes:

- Under the EP&A Act, the Applicant is required to obtain construction and occupation certificates for the proposed building works.
- Deleted.
- Deleted.

DEMOLITION

11. The Applicant **must** ensure that all demolition work is carried out in accordance with *Australian Standard AS 2601-2001: The Demolition of Structures*, or its latest version.

OPERATION OF PLANT AND EQUIPMENT

12. The Applicant **must** ensure that all plant and equipment used at the site is:
- maintained in a proper and efficient condition; and
 - operated in a proper and efficient manner.

EVIDENCE OF CONSULTATION

13. Where conditions of this consent require a document to be prepared in consultation with an identified party, the Applicant must:
- (a) consult with the relevant party prior to submitting the subject document to the Secretary for approval; and
 - (b) provide details of the consultation undertaken including:
 - a description of how matters raised by those consulted have been resolved to the satisfaction of both the Applicant and the party consulted; and
 - details of any disagreement remaining between the party consulted and the Applicant, and how the Applicant has addressed the matters not resolved.

COMPLIANCE

14. The Applicant must ensure that all employees, contractors and sub-contractors are made aware of, and instructed to comply with, the conditions of this consent relevant to activities they carry out in respect of the project.

CONTRIBUTION TO COUNCIL

15. The Applicant must make financial contributions to LMCC towards the maintenance of roads used for haulage of CWR products, where LMCC is the roads authority under the *Roads Act 1993*. The contributions and timing of payment must be determined in consultation with LMCC and in accordance with the LMCC local infrastructure contribution plan (including any updated or revised version of these plans) for local roads within the local government area.
16. If there is a dispute over the determination of the contributions in condition 15, the Applicant or the LMCC may refer the matter to the Planning Secretary for resolution. The decision of the Planning Secretary will be final.

SCHEDULE 3 ENVIRONMENTAL CONDITIONS – GENERAL

NOISE

Construction Noise

- The Applicant **must** ensure that the noise generated by construction activities is managed in accordance with the requirements of the *Interim Construction Noise Guideline* (DECC, 2009), as may be updated from time to time.

Operational Noise Criteria

- Until the automated coal recovery and train loading system required by condition 8 of Schedule 2 is in use, the Applicant **must** ensure that the operational noise generated by the development (including maintenance activities) does not exceed the criteria in Table 2 at any residence on privately-owned land.

Table 2: Operational Noise Criteria

Receiver	Noise Limit (dB(A))				
	Morning Shoulder ($L_{Aeq}(15\text{ min})$)	Day ($L_{Aeq}(15\text{ min})$)	Evening ($L_{Aeq}(15\text{ min})$)	Night ($L_{Aeq}(15\text{ min})$)	Night ($L_{A1}(1\text{ min})$)
NC2	36	36	35	35	45
NC3, Residences around NC6	40	40	39	39	45
23	-	37	37	37	45
26	-	36	36	36	45
All other residences on privately-owned land	-	35	35	35	45
		($L_{Aeq}(1\text{ hour})$)			
NC6 (school), when in use	-	45 (external to school building)	-	-	-

Notes to Table 2:

- The receiver locations in Table 2 are shown in Figures 1 and 2 of Appendix 4.
- Criteria for the Morning Shoulder period only applicable where these have been specifically developed for this period.

Noise generated by the development is to be measured in accordance with the relevant requirements and exemptions (including certain meteorological conditions) of the *NSW Noise Policy for Industry* (EPA, 2017). Appendix 3 sets out the meteorological conditions under which these criteria apply, and the requirements for evaluating compliance with these criteria.

However, these criteria do not apply if the Applicant has an agreement with the relevant landowner to exceed the noise criteria in Table 2, and the Applicant has advised the Department in writing of the terms of this agreement.

- Once the automated coal recovery and train loading system required by condition 8 of Schedule 2 is in use, and thereafter, the Applicant **must** ensure that the operational noise generated by the development (including maintenance activities) does not exceed the criteria in Table 3 at any residence on privately-owned land.

Table 3: Operational Noise Criteria

Receiver	Noise Limit (dB(A))				
	Morning Shoulder ($L_{Aeq}(15\text{ min})$)	Day ($L_{Aeq}(15\text{ min})$)	Evening ($L_{Aeq}(15\text{ min})$)	Night ($L_{Aeq}(15\text{ min})$)	Night ($L_{A1}(1\text{ min})$)
NC2	35	35	35	35	45
NC3, Residences around NC6	38	38	37	37	45
23	-	37	37	37	45
26	-	36	36	36	45

All other residences on privately-owned land	-	35	35	35	45
		(<i>L_{Aeq}(1 hour)</i>)			
NC6 (school), when in use	-	45 (external to school building)	-	-	-

Notes to Table 3:

- The receiver locations in Table 3 are shown in Figures 1 and 2 of Appendix 4.
- Criteria for the Morning Shoulder period only applicable where these have been specifically developed for this period.

Noise generated by the development is to be measured in accordance with the relevant requirements and exemptions (including certain meteorological conditions) of the *NSW Noise Policy for Industry (EPA, 2017)*. Appendix 3 sets out the meteorological conditions under which these criteria apply, and the requirements for evaluating compliance with these criteria.

However, these criteria do not apply if the Applicant has an agreement with the relevant landowner to exceed the noise criteria in Table 3, and the Applicant has advised the Department in writing of the terms of this agreement.

Operating Conditions

4. The Applicant **must**:
 - (a) implement best management practice to minimise the construction, operational, road and rail noise of the development;
 - (b) operate an on-site noise management system that uses a combination of predictions, forecasting and real-time and attended noise monitoring of all noise associated with the development, to ensure compliance with the relevant conditions of this consent, including noise during construction and operations;
 - (c) minimise the noise impacts of the development during meteorological conditions under which the noise limits in this consent do not apply (see Appendix 3); and
 - (d) regularly assess noise monitoring data to determine whether the development is complying with the relevant conditions of consent, to the satisfaction of the Secretary.

Noise Management Plan

5. The Applicant **must** prepare a Noise Management Plan for the development to the satisfaction of the Secretary. This plan must:
 - (a) be prepared in consultation with the EPA, by suitably qualified and experienced persons whose appointment has been approved by the Secretary;
 - (b) be submitted to the Secretary for approval by 31 March 2016 unless otherwise agreed by the Secretary;
 - (c) describe the measures that would be implemented to ensure compliance with the noise criteria and operating conditions of this consent, **including during the operation of the mobile crushing and screening plant at the NCSS**;
 - (d) describe the proposed noise management system in detail;
 - (e) include a monitoring program that evaluates and reports on:
 - the effectiveness of the on-site noise management system;
 - compliance against the noise criteria in this consent; and
 - compliance with the noise operating conditions in condition 4 above;
 - (f) include a program to calibrate and validate the real-time monitoring results with the attended monitoring results over time, so the real-time noise monitoring program can be used to better indicate compliance with the noise criteria in this consent, and trigger further attended monitoring as necessary;
 - (g) defines what constitutes a noise incident, and includes a protocol for identifying and notifying the Department and relevant stakeholders of any noise incidents; and
 - (h) outlines procedures to manage responses to any complaints or issues raised by the owners of affected residences.

The Applicant must implement the plan as approved by the Secretary.

AIR QUALITY & GREENHOUSE GAS

Odour

6. The Applicant **must** ensure that no offensive odours are emitted from the site, as defined under the POEO Act.

Air Quality Criteria

7. The Applicant **must** ensure that all reasonable and feasible avoidance and mitigation measures are employed so that particulate matter emissions generated by the development do not cause exceedances of the criteria in Table 4 at any residence on privately-owned land.

Table 4: Air quality criteria

Pollutant	Averaging Period	Criterion	
Particulate matter < 10 µm (PM ₁₀)	Annual	a,d 25 µg/m ³	
Particulate matter < 10 µm (PM ₁₀)	24 hour	b 50 µg/m ³	
Total suspended particulates (TSP)	Annual	a,d 90 µg/m ³	
^c Deposited dust	Annual	^b 2 g/m ² /month	a,d 4 g/m ² /month

Notes to Table 4:

a Cumulative impact (ie increase in concentrations due to the development plus background concentrations due to all other sources).

b Incremental impact (ie increase in concentrations due to the development alone, with zero allowable exceedances of the criteria over the life of the development).

c Deposited dust is to be assessed as insoluble solids as defined by Standards Australia, AS/NZS 3580.10.1:2003: Methods for Sampling and Analysis of Ambient Air - Determination of Particulate Matter - Deposited Matter - Gravimetric Method.

d Excludes extraordinary events such as bushfires, prescribed burning, dust storms, fire incidents or any other activity agreed by the Secretary.

e "Reasonable and feasible avoidance measures" includes, but is not limited to, the operational requirements in conditions 9 and 10 to develop and implement an air quality management system that ensures operational responses to the risks of exceedance of the criteria.

Mitigation Measures

8. If the development causes an exceedance of the air quality criteria in Table 4, the Applicant **must**, upon receiving a written request for air quality mitigation measures from the landowner, undertake air quality mitigation measures directed towards reducing the potential human health and amenity impacts of the development at a residence. These measures may include (for example):
- air conditioning, including heating;
 - first flush water systems;
 - installation and regular replacement of water filters;
 - cleaning of rainwater tanks;
 - clothes dryers; and
 - regular cleaning or any residence and its related amenities, such as barbeque areas and swimming pools.

If within 3 months of receiving this request from the owner, the Applicant and the owner cannot agree on the measures to be implemented, or there is a dispute about the implementation of these measures, then either party may refer the matter to the Secretary for resolution.

Operating Conditions

9. The Applicant **must**:
- implement all reasonable and feasible measures to minimise the:
 - off-site odour and dust emissions of the development; and
 - release of greenhouse gas emissions from the development;
 - minimise any visible air pollution generated by the development;
 - minimise the surface disturbance of the site;
 - operate a comprehensive air quality management system to ensure compliance with the relevant conditions of this consent; and
 - minimise the air quality impacts of the development during adverse meteorological conditions and extraordinary events (see note d to Table 4 above),

to the satisfaction of the Secretary.

Air Quality & Greenhouse Gas Management Plan

10. The Applicant **must** prepare an Air Quality & Greenhouse Gas Management Plan for the development, to the satisfaction of the Secretary. This plan must:
- be prepared in consultation with EPA, by suitably qualified and experienced persons whose appointment has been approved by the Secretary;
 - be submitted to the Secretary for approval by 31 March 2016, unless otherwise agreed by the Secretary;
 - describe the measures that would be implemented to ensure compliance with the relevant air quality criteria and operating conditions of this consent;
 - describe the on-site air quality management system in detail; and
 - include an air quality monitoring program that:
 - adequately supports the air quality management system;
 - includes PM_{2.5} monitoring;
 - includes the use of real-time monitors to evaluate the performance of the development;
 - evaluates and reports on:
 - compliance with the air quality criteria;
 - the effectiveness of the air quality management system; and
 - compliance against the air quality operating conditions in condition 9 above;
 - defines what constitutes an air quality incident, and includes a protocol for identifying and notifying the Department and relevant stakeholders of any air quality incidents.

The Applicant must implement the plan as approved by the Secretary.

Note: With the introduction of the EPA's NSW Guide for Large Emitters, the Applicant will be required to prepare and implement a greenhouse gas mitigation plans in accordance with requirements provided by the EPA. On implementation, these plans could be referenced to meet the requirements of this condition in relation to greenhouse gas emissions.

METEOROLOGICAL MONITORING

11. For the life of the development, the Applicant **must** ensure that there is a suitable meteorological station operating in the vicinity of the site that:
- complies with the requirements in the *Approved Methods for Sampling and Analysis of Air Pollutants in New South Wales* guideline; and
 - is capable of continuous real-time measurement of the atmospheric stability category determined by the sigma theta method in accordance with the *NSW Noise Policy for Industry (EPA, 2017)*.

WATER

Water Supply

12. The Applicant **must** ensure that it has sufficient water for all stages of the development, and if necessary, adjust the scale of its operations to match its available water supply.

Note: Under the Water Act 1912 and/or the Water Management Act 2000, the Applicant is required to obtain the necessary water licences for the development.

Water Pollution

13. Unless an EPL authorises otherwise, the Applicant **must** comply with Section 120 of the POEO Act.
14. The Applicant **must** implement all reasonable and feasible measures to reduce water pollution associated with the discharge of mine-water (particularly salinity and dissolved or suspended metals associated with groundwater pumped from underground mine workings) required to comply with any EPL applying to the development.

Mine-Water Discharges Management Plan

15. The Applicant **must** prepare a Mine-Water Discharges Management Plan for the development to the satisfaction of the Secretary. This plan must:
- be prepared in consultation with the EPA, by suitably qualified and experienced persons whose appointment has been approved by the Secretary;
 - be submitted to the Secretary for approval by 30 June 2016 unless otherwise agreed by the Secretary;
 - describe the measures that would be implemented to ensure compliance with conditions 13 and 14 and relevant performance measures in Table 5;

- (d) include targets, developed in co-operation with the EPA, to reduce acute and chronic toxicity from mine-water discharged from both the NCSS and CES to achieve the in-stream water quality and aquatic ecology objectives and criteria required by condition 16 below;
- (e) include measures, developed in co-operation with the EPA to be implemented over 2-year, 10-year and life-of-project timeframes to reduce the salinity and metals toxicity in mine-water discharged from both the NCSS and CES to achieve these targets; and
- (f) take into account relevant requirements of the Water Management Plan required by condition 17 below.

The Applicant must implement the plan as approved by the Secretary.

Water Management Performance Measures

16. The Applicant **must** comply with the performance measures in Table 5, to the satisfaction of the Secretary.

Table 5: Water Management Performance Measures

Feature	Performance Measure
Potable Water	<ul style="list-style-type: none"> Minimise the use of potable water from the public supply for purposes where non-potable water is acceptable.
Site (as a whole)	<ul style="list-style-type: none"> Design, install and maintain erosion and sediment controls generally in accordance with the series <i>Managing Urban Stormwater: Soils and Construction</i> including <i>Volume 1</i>, <i>Volume 2A – Installation of Services</i> and <i>Volume 2C – Unsealed Roads</i>. Design, install and maintain any infrastructure within 40 m of watercourses generally in accordance with the <i>Guidelines for Controlled Activities on Waterfront Land</i> (DPI 2012), or the latest version. Design, install and maintain creek crossings generally in accordance with the <i>Policy and Guidelines for Fish Friendly Waterway Crossings</i> (NSW Fisheries 2003) and <i>Why Do Fish Need To Cross The Road? Fish Passage Requirements for Waterway Crossings</i> (NSW Fisheries 2003), or the latest versions.
Sediment Dams	<ul style="list-style-type: none"> Maintain dams generally in accordance with the series <i>Managing Urban Stormwater: Soils and Construction – Volume 1 and Volume 2E Mines and Quarries</i>.
Clean water diversions	<ul style="list-style-type: none"> Design, install and maintain new clean water diversion structures to convey the 100 year ARI flood. Maximise as far as reasonable and feasible the diversion of clean water around disturbed areas on site.
Mine-water storages	<ul style="list-style-type: none"> Design, install and maintain mine-water storage infrastructure to ensure no unlicensed or uncontrolled discharge of mine-water off-site.
Aquatic and riparian ecosystems (including affected sections of LT, Stony and Lords Creeks, unnamed watercourses receiving discharges from Hawkmount Quarry and CES, Muddy Creek and Muddy Lake)	<ul style="list-style-type: none"> Maintain or improve baseline channel stability Develop site-specific in-stream water quality and aquatic ecology (macroinvertebrate health and ecotoxicity assessment) objectives and criteria in consultation with the EPA and in accordance with any EPL applying to the NCSS and/or CES.
Chemical and hydrocarbon storage	<ul style="list-style-type: none"> Chemical and hydrocarbon products to be stored in bunded areas in accordance with the relevant Australian Standards.

Water Management Plan

17. The Applicant **must** prepare and a Water Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with [DPE Water](#) and the EPA, by suitably qualified and experienced persons whose appointment has been approved by the Secretary;
 - (b) be submitted to the Secretary for approval by 31 March 2016, unless otherwise agreed by the Secretary;
 - (c) include detailed performance criteria and describe measures to ensure that the Applicant complies with the Water Management Performance Measures in Table 5;
 - (d) include the following, in addition to the standard requirements for management plans (see condition 2 of Schedule 5):
 - (i) a Site Water Balance, that includes details of:
 - water use and management on site;

- any off-site water discharges; and
 - reporting procedures, including the preparation of a site water balance for each calendar year of the development; and
 - investigates and implements all reasonable and feasible measures to minimise potable water use and to recycle water;
- (ii) a Surface Water Management Plan, that includes:
- detailed baseline data on water flows and quality in the watercourses that could be affected by the development;
 - a detailed description of the development's water management systems, including the:
 - clean water diversion systems;
 - erosion and sediment controls; and
 - mine-water management systems;
 - detailed plans including design objectives and performance criteria for:
 - design and management for the emplacement of coal reject materials and any potential acid-forming materials;
 - the proposed piping of LT Creek to enable the construction of coal stockpiles; and
 - management of sodic and dispersible soils;
 - detailed performance criteria, including trigger levels, for investigating any potentially adverse impacts associated with:
 - the water management systems;
 - downstream surface water quality;
 - downstream watercourse channel stability, particularly for the Fassifern Archery Club section of LT Creek;
 - downstream flooding impacts; and
 - stream and riparian vegetation health;
 - a program to monitor and report on:
 - the effectiveness of the water management systems; and
 - surface water flows and water quality, and the condition of stream and riparian vegetation in the watercourses on site and downstream of the site;
 - macroinvertebrate health and ecotoxicity parameters downstream of mine-water discharges; and
 - downstream flooding impacts;
 - reporting procedures for the results of the monitoring program; and
 - a plan to respond to any exceedances of the performance criteria, and mitigate any adverse surface water impacts of the development.

The Applicant must implement the plan as approved by the Secretary.

BIODIVERSITY

Biodiversity Offset Strategy

18. Prior to clearing any native vegetation, the Applicant **must** finalise a Biodiversity Offset Strategy, to compensate for the clearing of 2.13 ha of *Coastal Foothills Spotted Gum – Ironbark Forest*, 5.06 ha of *Coastal Plains Smooth-barked Apple Woodland* and 241 clumps of *Tetratheca juncea*. The Biodiversity Offset Strategy must:
- (a) be finalised in consultation with BCD;
 - (b) include a suitable biodiversity offset area, and make arrangements to manage, protect and provide long-term security for the biodiversity offset area; and
 - (c) make other arrangements to offset vegetation clearing, such as research into genetic diversity of *Tetratheca juncea*, in consultation with BCD, to the satisfaction of the Secretary.

Biodiversity Management Plan

19. The Applicant **must** prepare a Biodiversity Management Plan for the development to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with BCD and HLLS, and submitted to the Secretary for approval prior to clearing any native vegetation or by 31 December 2016, whichever is the sooner;
 - (b) describe the short-term, medium-term, and long-term measures that would be implemented to:
 - manage remnant vegetation and habitat at the site;
 - avoid or minimise direct and indirect impacts to threatened species outside of proposed areas of ground disturbance; and
 - implement the Biodiversity Offset Strategy;
 - (c) include detailed performance and completion criteria for the Biodiversity Offset Strategy;
 - (d) include a detailed description of the measures that would be implemented over the next 3 years (to be

- updated for each 3-year period following initial preparation of the plan) to:
 - enhance the quality of existing vegetation and fauna habitat;
 - minimise the impacts to fauna, including undertaking pre-clearance surveys;
 - replace cleared hollow-bearing trees with appropriate nest boxes at a ratio of 2:1;
 - provide for the translocation of *Tetratheca juncea* clumps affected by the development;
 - manage salinity;
 - control erosion, weeds, feral pests and unauthorised access; and
 - manage bushfire risk; and
- (e) include a program to monitor and report on these measures, and progress against the performance and completion criteria.

The Applicant must implement the plan as approved by the Secretary.

Conservation Bond

20. Prior to clearing any native vegetation associated with the Biodiversity Offset Strategy referred to in condition 18, Schedule 3, unless the Secretary agrees otherwise, the Applicant **must** lodge a Conservation Bond with the Department, to ensure that the Biodiversity Offset Strategy is implemented in accordance with the performance and completion criteria of the Biodiversity Management Plan.

The sum of the bond **must** be determined by:

- (a) calculating the full cost of implementing the Biodiversity Offset Strategy (other than land acquisition costs); and
- (b) employing a suitably qualified quantity surveyor to verify the calculated costs.

The calculation of the Conservation Bond must be submitted to the Department for approval at least 1 month prior to the lodgment of the bond.

The Conservation Bond must be reviewed and if required, an updated bond must be lodged with the Department within 3 months following:

- (a) an update or revision to the Biodiversity Management Plan;
- (b) the completion of an Independent Environmental Audit in which recommendations relating to the implementation of the Biodiversity Offset Strategy have been made; or
- (c) a request for review by the Secretary.

The Secretary will release the bond if the offset strategy is completed generally in accordance with the completion criteria in the Biodiversity Management Plan. If the offset strategy is not completed generally in accordance with the completion criteria in the Biodiversity Management Plan, the Secretary will call in all, or part of, the Conservation Bond, and arrange for the satisfactory completion of the relevant works.

Notes:

- Alternative funding arrangements for long-term management of the Biodiversity Offset Strategy, such as provision of capital and management funding as agreed by BCD as part of a Biobanking Agreement, or transfer to the conservation reserve estate can be used to reduce the liability of the Conservation Bond.
- The sum of the bond may be reviewed in conjunction with any revision to the Biodiversity Management Plan.

HERITAGE

Heritage Management Plan

21. The Applicant **must** prepare a Heritage Management Plan for the development, to the satisfaction of the Secretary. This plan must:
- (a) be prepared in consultation with Heritage NSW and Registered Aboriginal Parties;
 - (b) be submitted to the Secretary for approval, prior to commencement of construction activities, or by 31 March 2016, whichever is sooner; and
 - (c) include:
 - a description of the measures that would be implemented to:
 - protect, monitor and/or manage Aboriginal cultural heritage items including the scarred tree adjacent to Hawkmount Quarry identified as RPS COAL LOG 1 (AHIMS 45-7-0324);
 - manage the discovery of previously unidentified Aboriginal items;
 - maintaining and managing reasonable access for Aboriginal stakeholders to heritage items on the Applicant's land;
 - ongoing consultation with Aboriginal stakeholders in the conservation and management of Aboriginal cultural heritage;
 - a short-term and long-term strategy for the storage of any Aboriginal cultural heritage items salvaged on site; and

- a protocol for the management of impacts to historic heritage sites/items, including archival recording where impacts to historic heritage sites/items cannot be avoided.

The Applicant must implement the plan as approved by the Secretary.

Note: This plan can be incorporated with any Heritage Management Plan for Centennial's other mines and mine infrastructure on the Central Coast / Lake Macquarie areas.

TRAFFIC AND TRANSPORT

22. The Applicant **must**, at its own cost, repair any damage to any local road caused by construction traffic from the development, to the satisfaction of LMCC.

Construction Traffic Management Plan

23. The Applicant **must** prepare a Construction Traffic Management Plan for the development, to the satisfaction of the Secretary. This plan must:
- be prepared in consultation with LMCC;
 - be approved by the Secretary prior to the commencement of construction at NCSS or Hawkmount Quarry; and
 - detail the measures that would be applied to:
 - limit the noise and dust impacts of construction traffic; and
 - avoid and/or limit potential conflicts between construction traffic and other road users.

The Applicant must implement the plan as approved by the Secretary.

Traffic Management Plan

- 23A. The Applicant must prepare a Traffic Management Plan prior to transporting any CWR from the NCSS site, to the satisfaction of the Secretary. This plan must:
- be prepared by suitably qualified and experienced person/s and in consultation with TfNSW and LMCC;
 - include details of traffic management measures related to the transport of CWR to external customers, including:
 - the designated transport route to be used;
 - processes in place for the control of truck movements entering and exiting the site;
 - measures to be implemented to:
 - ensure compliance with the traffic operating conditions and other traffic related conditions of this consent;
 - manage the traffic impacts from contractors and subcontractors;
 - minimise traffic safety issues and disruption to local road users, including minimising potential for congestion at key intersections during peak periods;
 - minimise the transmission of dust and tracking of material onto the surface of public roads from vehicles exiting the site;
 - monitor driver behaviour; and
 - participate in transport management investigations initiated by LMCC;
 - include a Drivers' Code of Conduct that includes procedures to ensure that drivers:
 - adhere to posted speed limits or other required travelling speeds;
 - adhere to designated transport routes and travel time restrictions;
 - adhere to driver behaviour expectations and safety requirements;
 - implement safe and quiet driving practices, including restriction on the use of compression braking;
 - describe the measures to be put in place to ensure compliance with the Drivers' Code of Conduct.

The Applicant must implement the approved Traffic Management Plan.

VISUAL

Visual Amenity and Lighting

24. The Applicant **must**:
- implement all reasonable and feasible measures to minimise the visual and off-site lighting impacts of the development;
 - ensure that all external lighting associated with the development complies with *Australian Standard AS4282 (INT) 1995 - Control of Obtrusive Effects of Outdoor Lighting*; and
 - take all practical measures to shield views of mining operations from users of public roads and privately-owned residences, to the satisfaction of the Secretary.

WASTE

25. The Applicant **must**:
- minimise and monitor the waste generated by the development;
 - ensure that the waste generated by the development is appropriately stored, handled and disposed of in accordance with the requirements of the EPA;
 - manage on-site sewage treatment and disposal in accordance with the requirements of LMCC and EPA; and
 - report on waste management and minimisation in the Annual Review, to the satisfaction of the Secretary.

BUSHFIRE MANAGEMENT

26. The Applicant **must**:
- ensure appropriate Asset Protection Zones are maintained at NCSS and CES, to the satisfaction of LMCC;
 - ensure that the NCSS and CES are suitably equipped to respond to fires; and
 - assist the Rural Fire Service and emergency services as much as possible if there is a fire in the vicinity of the site.

REHABILITATION

Rehabilitation Objectives

27. The Applicant **must** rehabilitate the site **in accordance with the conditions imposed on the mining lease(s) associated with the project under the Mining Act 1992**. This rehabilitation must be generally consistent with the proposed rehabilitation strategy described in the EIS, and comply with the objectives in Table 6.

Table 6: Rehabilitation Objectives

Feature	Objective
Site (as a whole)	<ul style="list-style-type: none"> Safe, stable & non-polluting
Surface infrastructure	<ul style="list-style-type: none"> To be decommissioned and removed, unless Resources Regulator agrees otherwise. NCSS, CES, Hawkmount Quarry and Reject Emplacement areas to be made safe and hydraulically and geotechnically stable. NCSS and CES to be rehabilitated for use as light industrial areas; or revegetated with suitable local native plant species to a landform consistent with the surrounding environment.
Reject Emplacement Areas	<ul style="list-style-type: none"> Hawkmount Quarry and the Reject Emplacement Area sites to be revegetated with suitable local native plant species, and to a landform consistent with the surrounding environment. Capping materials (including depth of application) to be approved by Resources Regulator prior to capping.
Revegetated final landforms	<ul style="list-style-type: none"> Stable and sustain the intended land use. Consistent with surrounding topography to minimise visual impacts. Incorporate relief patterns and design principles consistent with natural drainage.
Native flora and fauna	<ul style="list-style-type: none"> Flora species used in rehabilitation selected to re-establish and complement local and regional biodiversity. Rehabilitated areas contribute to achieving self-sustaining biodiversity habitats.
All watercourses subject to mine-water discharges	<ul style="list-style-type: none"> Hydraulically and geomorphologically stable, with aquatic ecology and riparian vegetation that is the same or better than prior to grant of this consent.
Water quality	<ul style="list-style-type: none"> Water retained on site is fit for the intended post mining land use(s). Water management is consistent with the regional catchment management strategy.

Community	<ul style="list-style-type: none"> • Ensure public safety. • Minimise the adverse socio-economic effects of mine closure.
-----------	---

Progressive Rehabilitation

28. The Applicant **must** rehabilitate the site as soon as reasonably practicable after the disturbance occurs.

Rehabilitation Strategy

- 28A. The Applicant must prepare a Rehabilitation Strategy for the development, to the satisfaction of the Secretary. The Rehabilitation Strategy must:
- be prepared by a suitably qualified and experienced person(s) whose appointment has been endorsed by the Secretary;
 - be prepared in consultation with Resources Regulator, BCD, DPE Water, Council and the CCC;
 - be submitted to the Secretary for approval within 6 months of the date of determination of SSD-5145 MOD 3, or as otherwise agreed by the Secretary;
 - build upon the Rehabilitation Objectives in Table 6 and describe the strategic rehabilitation outcomes for the site, including mine closure, final landform, post-mining land use/s and water management;
 - align with the strategic rehabilitation and mine closure objectives and address the principles of the Strategic Framework for Mine Closure (ANZMEC and MCA, 2000), or its latest version;
 - describe how rehabilitation will be integrated with the mine planning process, including a plan to address premature or temporary mine closure;
 - include details of:
 - target vegetation communities and species to be established within the proposed revegetation areas;
 - a post-mining land use strategy to investigate and facilitate post-mining beneficial land uses for the site and/or infrastructure; and
 - stakeholder engagement plan to guide rehabilitation and mine closure planning processes and outcomes.
 - investigate opportunities to refine and improve the final landform over time.

Note: The Rehabilitation Strategy must address all land impacted by the mine, whether prior to or following the date of this consent.

- 28B. The Applicant must implement the approved Rehabilitation Strategy

Rehabilitation Management Plan

29. The Applicant **must** prepare a Rehabilitation Management Plan for the development, in accordance with the conditions imposed on the mining lease(s) associated with the development under the *Mining Act 1992*.

SCHEDULE 4

ADDITIONAL PROCEDURES

NOTIFICATION OF LANDOWNERS

1. As soon as practicable after obtaining monitoring results showing:
 - (a) an exceedance of any relevant criteria in Schedule 3, the Applicant **must** notify affected landowners in writing of the exceedance, and provide regular monitoring results to each affected landowner until the development is again complying with the relevant criteria; and
 - (b) an exceedance of any relevant air quality criteria in Schedule 3, the Applicant **must** send a copy of the NSW Health fact sheet entitled "Mine Dust and You" (as may be updated from time to time) to the affected landowners and/or existing tenants of the land (including the tenants of any mine-owned land).

INDEPENDENT REVIEW

2. If an owner of privately-owned land considers the development to be exceeding the relevant criteria in Schedule 3, then he/she may ask the Secretary in writing for an independent review of the impacts of the development on his/her land.

If the Secretary is satisfied that an independent review is warranted, then within 2 months of the Secretary's decision the Applicant **must**:

- (a) commission a suitably qualified, experienced and independent person, whose appointment has been approved by the Secretary, to:
 - consult with the landowner to determine his/her concerns;
 - conduct monitoring to determine whether the development is complying with the relevant criteria in Schedule 3; and
 - if the development is not complying with these criteria, identify and implement measures to ensure compliance with the relevant criteria; and
 - (b) give the Secretary and landowner a copy of the independent review.
-

SCHEDULE 5

ENVIRONMENTAL MANAGEMENT, REPORTING AND AUDITING

ENVIRONMENTAL MANAGEMENT

Environmental Management Strategy

1. The Applicant **must** prepare an Environmental Management Strategy for the development to the satisfaction of the Secretary. This strategy must:
 - (a) be submitted to the Secretary for approval by 31 March 2016, or as otherwise agreed by the Secretary;
 - (b) provide the strategic framework for environmental management of the development;
 - (c) identify the statutory approvals that apply to the development;
 - (d) describe the role, responsibility, authority and accountability of all key personnel involved in the environmental management of the development;
 - (e) describe the procedures that would be implemented to:
 - keep the local community and relevant agencies informed about the operation and environmental performance of the development;
 - receive, handle, respond to, and record complaints;
 - resolve any disputes that may arise during the course of the development;
 - respond to any non-compliance; and
 - respond to emergencies; and
 - (f) include:
 - **references to** any strategies, plans and programs approved under the conditions of this consent; and
 - a clear plan depicting all the monitoring required to be carried out under the conditions of this consent.

The Applicant must implement the strategy as approved by the Secretary.

Management Plan Requirements

2. The Applicant **must** ensure that the management plans required under this consent are prepared in accordance with any relevant guidelines, and include:
 - (a) detailed baseline data;
 - (b) a description of:
 - the relevant statutory requirements (including any relevant approval, licence or lease conditions);
 - any relevant limits or performance measures/criteria; and
 - the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation of, the development or any management measures;
 - (c) a description of the measures that would be implemented to comply with the relevant statutory requirements, limits, or performance measures/criteria;
 - (d) a program to monitor and report on the:
 - impacts and environmental performance of the development; and
 - effectiveness of any management measures;
 - (e) a contingency plan to manage any unpredicted impacts and their consequences and to ensure that ongoing impacts reduce to levels below relevant impact assessment criteria as quickly as possible;
 - (f) a program to investigate and implement ways to improve the environmental performance of the development over time;
 - (g) a protocol for managing and reporting any:
 - incidents;
 - complaints;
 - non-compliances with statutory requirements; and
 - exceedances of the impact assessment criteria and/or performance criteria; and
 - (h) a protocol for periodic review of the plan.

Note: The Secretary may waive some of these requirements if they are unnecessary or unwarranted for particular management plans.

Application of Existing Management Plans

3. Prior to the approval of management plans under this consent, the Applicant **must** manage development undertaken pursuant to this consent in accordance with any equivalent or similar management plan/s required under development consents DA 97/800 or DA 73-11-98.

Staged Submission of Strategies, Plans or Programs

4. With the approval of the Secretary, the Applicant may submit any strategies, plans or programs required by this consent on a progressive basis.

Note: If the submission of any strategy, plan or program is to be staged, then the Applicant must ensure that existing strategy, plan or program must clearly describe the specific stage to which the strategy, plan or program applies, the relationship of this stage to any future stages, and the trigger for updating the strategy, plan or program.

Consolidation of Strategies, Plans or Programs

5. With the approval of the Secretary, the Applicant may incorporate any strategies, plans or programs required by this consent with the strategies, plans and programs required for Centennial's mining operations within the general vicinity of the development.

Revision of Strategies, Plans and Programs

6. Within 3 months of:
- (a) the submission of an incident report under condition 9 below;
 - (b) the submission of an annual review under condition 11 below;
 - (c) the submission of an audit report under condition 12 below; or
 - (d) **the approval of any modification to the conditions of this consent;**
- the Applicant **must** review, and if necessary revise, the strategies, plans, and programs required under this consent to the satisfaction of the Secretary.

Where this review leads to revisions in any such document, then within 4 weeks of the review, the revised document must be submitted to the Secretary for approval.

Note: This condition ensures that strategies, plans and programs are updated on a regular basis, and incorporate any recommended measures to improve the environmental performance of the development.

Adaptive Management

7. The Applicant must assess and manage development-related risks to ensure that there are no exceedances of the criteria and/or performance measures in Schedule 3. Any exceedance of these criteria and/or performance measures constitutes a breach of this consent and may be subject to penalty or offence provisions under the EP&A Act or EP&A Regulation.

Where any exceedance of these criteria and/or performance measures has occurred, the Applicant must, at the earliest opportunity:

- (a) take all reasonable and feasible steps to ensure that the exceedance ceases and does not reoccur;
- (b) consider all reasonable and feasible options for remediation (where relevant) and submit a report to the Department describing those options and any preferred remediation measures or other course of action; and
- (c) implement remediation measures as directed by the Secretary, to the satisfaction of the Secretary.

Community Consultative Committee

8. The Applicant must establish a Community Consultative Committee (CCC) for the development to the satisfaction of the Secretary. This CCC must be operated in general accordance with the **Community Consultative Committee (CCC) Guidelines for State Significant Developments** (Department of Planning and Environment, 2016) or its latest version.

Notes:

- *This condition may be satisfied by a CCC for the Newstan / Awaba Mines already in place as at the date of this consent.*
- *In accordance with the Guidelines, the CCC must include an independent chair and appropriate representation from the Applicant, Council, recognised environmental groups and the local community.*
- *The CCC is an advisory committee. The Department and other relevant agencies are responsible for ensuring that the Applicant complies with this consent.*
- *The requirement for this CCC may be fulfilled by a regional CCC for Centennial's mines and mine infrastructure in the Central Coast/Lake Macquarie areas.*

REPORTING

Incident Reporting

9. The Applicant **must** immediately notify the Secretary and any other relevant agencies of any incident that has caused, or threatens to cause, material harm to the environment. For any other incident associated with the development, the Applicant **must** notify the Secretary and any other relevant agencies as soon as practicable after the Applicant becomes aware of the incident. Within 7 days of the date of the incident, the Applicant **must** provide the Secretary and any relevant agencies with a detailed report on the incident, and such further reports as may be requested.

Regular Reporting

10. The Applicant **must** regularly report the environmental performance of the development on its website, in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent.

Annual Review

11. By the end of March each year, or as otherwise agreed by the Secretary, the Applicant **must submit a report to the Department reviewing** the environmental performance of the development to the satisfaction of the Secretary. This review must:
 - (a) describe the development (including any rehabilitation) that was carried out in the past calendar year, and the development that is proposed to be carried out over the current calendar year;
 - (b) include a comprehensive review of the monitoring results and complaints records of the development over the past calendar year, which includes a comparison of these results against the:
 - (i) relevant statutory requirements, limits or performance measures/criteria;
 - (ii) requirements of any plan or program required under this consent;
 - (iii) monitoring results of previous years; and
 - (iv) relevant predictions in the **documents identified in condition 2(a) of Schedule 2;**
 - (c) identify any non-compliance over the past calendar year, and describe what actions were (or are being) taken to ensure compliance;
 - (d) identify any trends in the monitoring data over the life of the development;
 - (e) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and
 - (f) describe what measures will be implemented over the current calendar year to improve the environmental performance of the development.

INDEPENDENT ENVIRONMENTAL AUDIT

12. By 14 May 2018, and every 3 years thereafter, unless the Secretary directs otherwise, the Applicant **must** commission, **commence and** pay the full cost of an Independent Environmental Audit of the development. This audit must:
 - (a) be conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Secretary;
 - (b) include consultation with the relevant agencies;
 - (c) assess the environmental performance of the development and whether it is complying with the requirements in this consent and any relevant EPL or Mining Lease (including any assessment, plan or program required under these approvals);
 - (d) review the adequacy of strategies, plans or programs required under the abovementioned approvals;
 - (e) recommend appropriate measures or actions to improve the environmental performance of the development, and/or any assessment, plan or program required under the abovementioned approvals; **and**
 - (f) **be conducted and reported to the satisfaction of the Secretary.**

Note: This audit team must be led by a suitably qualified auditor and include experts in any field specified by the Secretary.

13. Within **12 weeks of commencing** this audit, or as otherwise agreed by the Secretary, the Applicant **must** submit a copy of the audit report to the Secretary, together with its response to any recommendations contained in the audit report **and a timetable for the implementation of any measures proposed to address the recommendations.**

ACCESS TO INFORMATION

14. Within 3 months of the date of this consent, the Applicant **must**:
 - (a) make copies of the following publicly available on its website:

- (i) the documents referred to in condition 2(a) and (b) of Schedule 2;
 - (ii) all current statutory approvals for the development;
 - (iii) all approved strategies, plans and programs required under the conditions of this consent;
 - (iv) a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs;
 - (v) a complaints register, updated monthly;
 - (vi) minutes of CCC meetings for the last 2 years;
 - (vii) the annual reviews of the development;
 - (viii) any independent environmental audit of the development, and the Applicant's response to the recommendations in any audit;
 - (ix) any other matter required by the Secretary; and
- (b) keep this information up-to-date, to the satisfaction of the Secretary.
-

APPENDIX 2: DEVELOPMENT LAYOUT

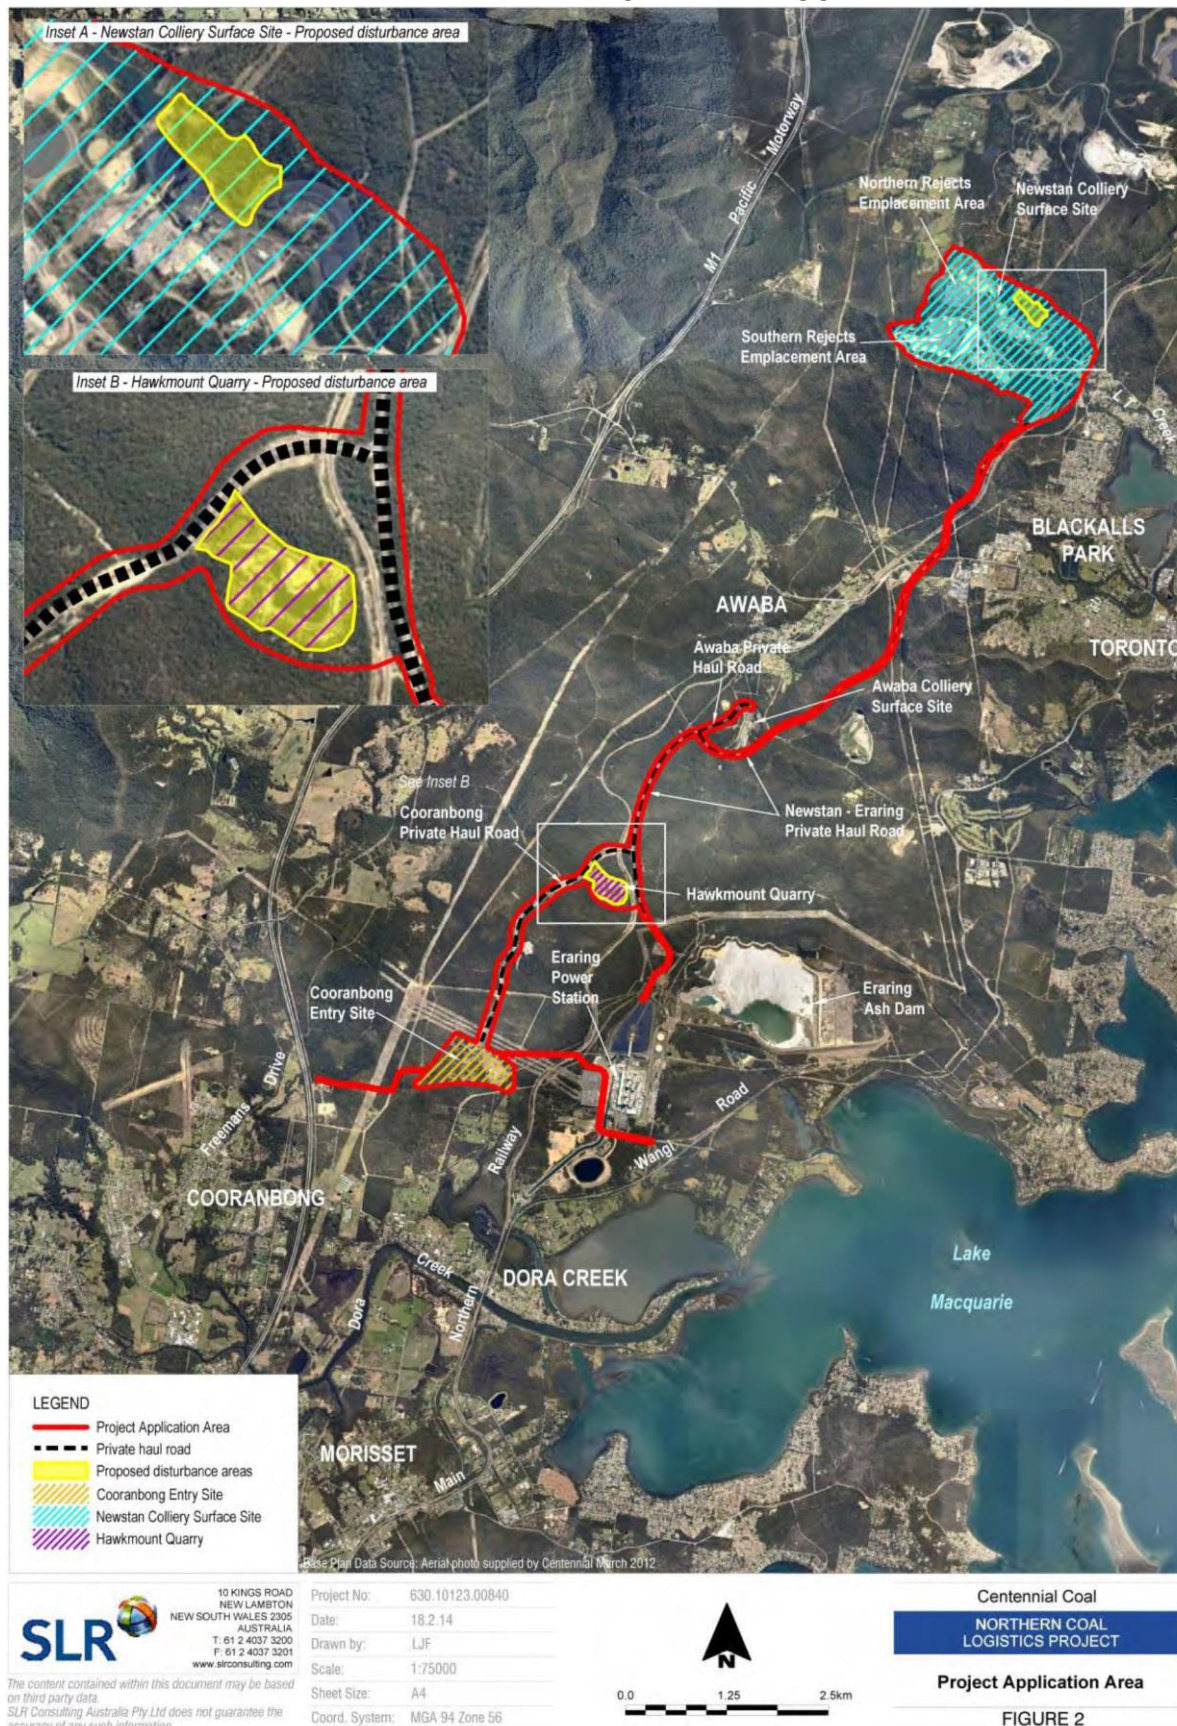

Figure 1: Northern Coal Logistics Project- Application Area

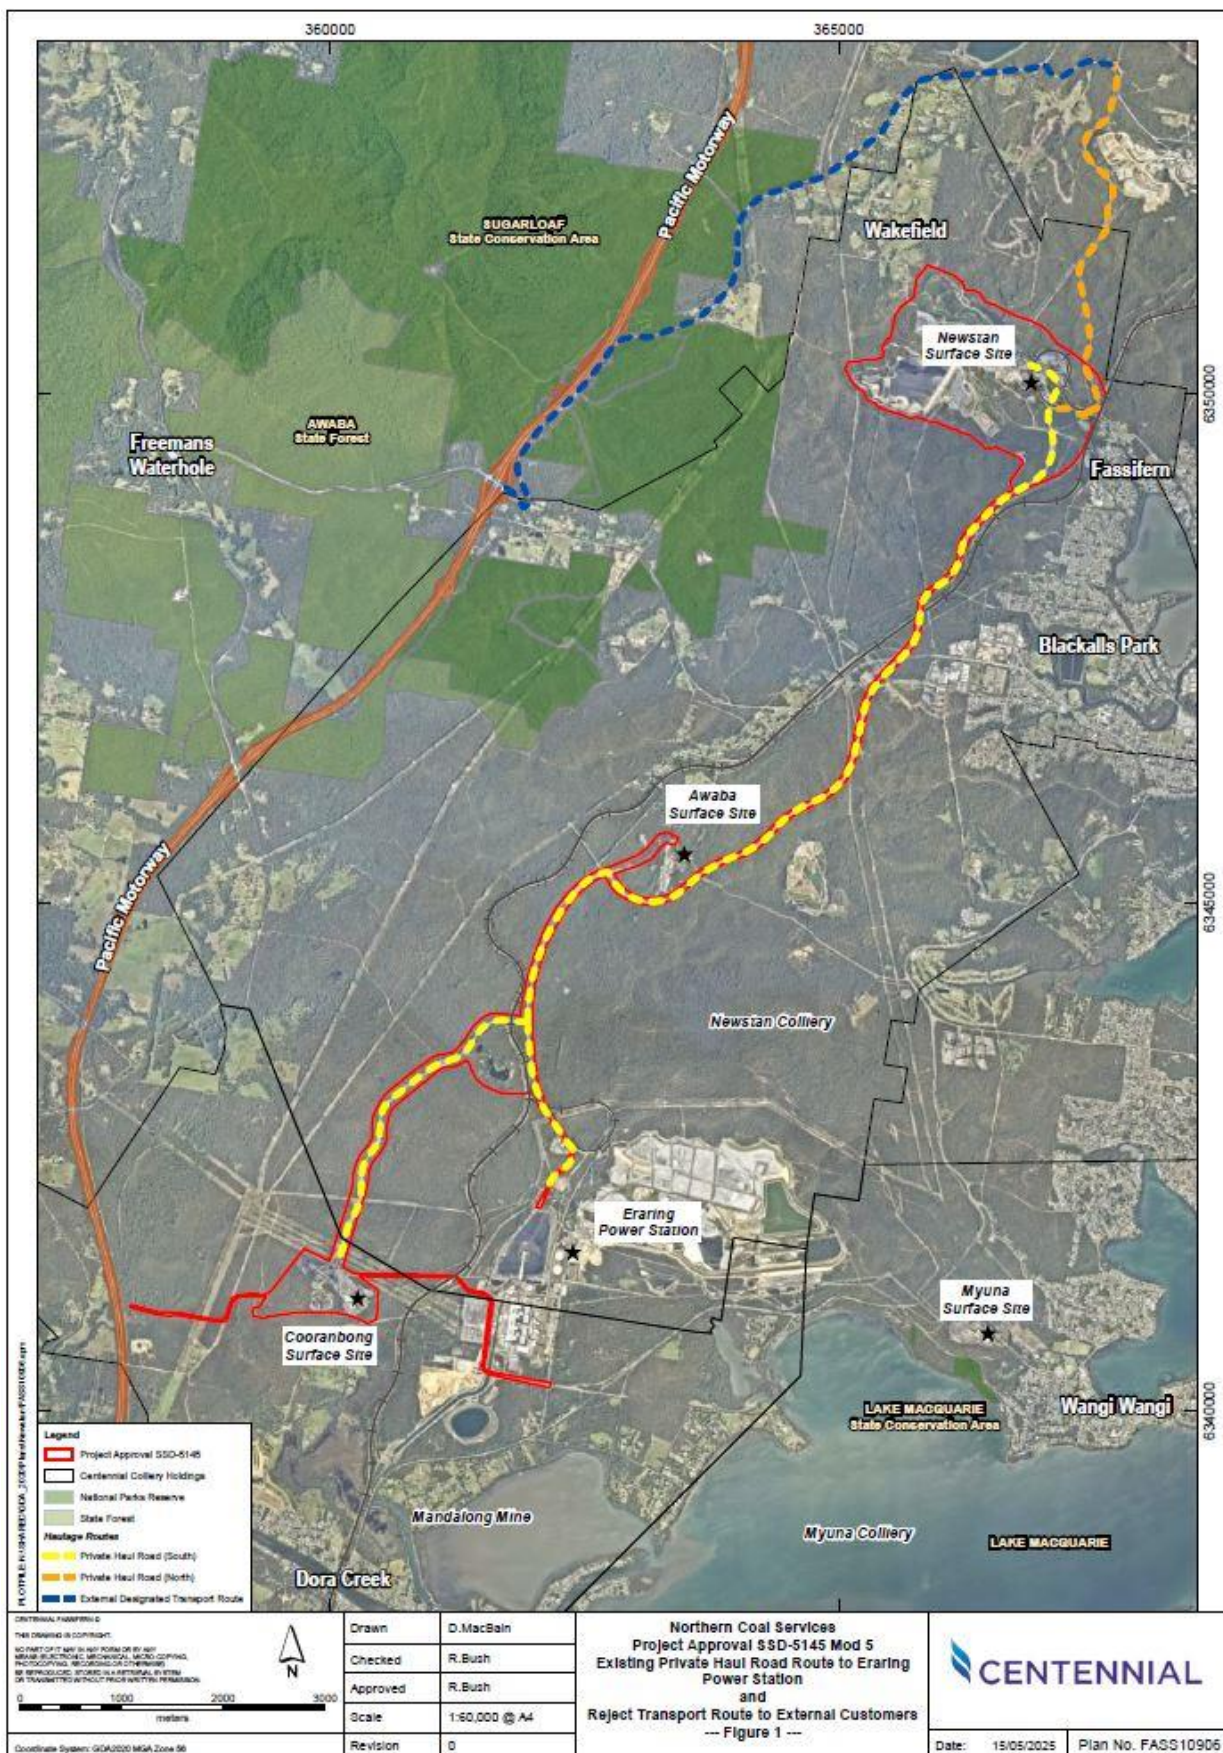

Figure 2: Cooranbong Entry Site (CES)

Figure 3: Newstan Colliery Surface Site (NCSS)

APPENDIX 2A: LOCATION OF THE PRIVATE HAULAGE ROAD AND DESIGNATED TRANSPORT ROUTE TO BE UTILISED FOR THE SUPPLY OF CWR TO EXTERNAL CUSTOMERS

APPENDIX 2B: PERMITTED MOBILE CRUSHING AND SCREENING PLANT OPERATIONAL LOCATIONS AT THE NCSS

APPENDIX 3: NOISE ASSESSMENT

Applicable Meteorological Conditions

1. The noise criteria in Tables 2 and 3 of the conditions are to apply under all meteorological conditions except the following:
 - (a) Wind speeds greater than 3 m/s at 10 m above ground level; or
 - (b) Stability category F temperature inversion conditions and wind speeds greater than 2 m/s at 10 m above ground level; or
 - (c) Stability category G temperature inversion conditions.

Determination of Meteorological Conditions

2. Except for wind speed at microphone height, the data to be used for determining meteorological conditions shall be that recorded by the meteorological station located on the site.

Compliance Monitoring

3. Attended monitoring is to be used to evaluate compliance with the relevant conditions of this consent.
4. Unless the Secretary agrees otherwise, this monitoring is to be carried out in accordance with the relevant requirements for reviewing performance set out in the *NSW Noise Policy for Industry 2017 (EPA, 2017)* (as amended from time to time), in particular the requirements relating to:
 - (a) monitoring locations for the collection of representative noise data;
 - (b) meteorological conditions during which collection of noise data is not appropriate;
 - (c) equipment used to collect noise data, and conformity with Australian Standards relevant to such equipment; and
 - (d) modifications to noise data collected, including for the exclusion of extraneous noise and/or penalties for modifying factors apart from adjustments for duration.

APPENDIX 4: NOISE RECEIVER LOCATIONS

APPENDIX 6: APPLICANT'S STATEMENT OF COMMITMENTS

Desired Outcome	Commitment/Action
Construction Management	
Minimise impacts from the upgrade works at the Newstan Colliery Surface Site on the environment and sensitive receivers	Six months prior to the commencement of any construction activities at the Newstan Colliery Surface Site, Northern Coal Services will develop a Construction Environmental Management Plan.
	All construction activity at the Newstan Colliery Surface Site will occur between the standard hours of 7.00 am to 6.00 pm Monday to Friday and 8.00 am to 1.00 pm on Saturday (no construction on Sundays or public holidays).
Environmental Management and Reporting	
Enable Northern Coal Services to manage its operations in an environmentally appropriate manner	Within six months following development consent, Centennial will develop a single consolidated EMS for Centennial's northern operations, including the Northern Coal Logistics Project. The review will take into consideration the environmental assessments undertaken as part of this EIS, the commitments made in this EIS and all relevant consent conditions.
Enable Northern Coal Services to meet its statutory reporting obligations	Northern Coal Services will obtain a new EPL for the Project in accordance with the POEO Act requirements.
	Each year, Northern Coal Services will prepare an Annual Review, which will report environmental monitoring results and evaluate performance for the previous 12 month period, to be distributed to the relevant government agencies, Newstan Colliery CCC and Mandalong Mine CCC.
	Northern Coal Services will report all monitoring results monthly on Centennial's website in accordance with the POEO Act.
Soil and Land Capability	
Appropriate management of topsoil during construction	Northern Coal Services will incorporate soil stripping, handling, stockpiling and transportation management activities into the Construction Environmental Management Plan for the proposed upgrade works at the Newstan Colliery Surface Site.
Water	
Monitor water impacts on the environment	Within six months of development consent, Northern Coal Services will develop a single consolidated Water Management Plan, including a water monitoring program, for the Northern Coal Logistics Project.
Minimise impacts to waterways downstream of Newstan Colliery Surface Site	<p><u>LT Creek</u></p> <ul style="list-style-type: none"> The stability of LT Creek through the Fassifern Archery Club will be increased with the construction of small rock bed control structures within the flow area. Quarterly and event based waterway visual inspections of LT Creek will be undertaken during the initial period of increased discharge via Newstan LDP001 until the stability of the creek under the new flow regime has been confirmed. <p><u>Stony Creek</u></p> <p>The stability of waterway between Newstan LDP017 and Stony Creek will be monitored. If identified as necessary, localised bank protection works will be undertaken to bank</p>

	sections where water discharges from Newstan Colliery Surface Site are identified as reducing bank stability. Such works will be subject to land owner consent.
Flora and Fauna	
Monitor and mitigate impacts to Bat Alley at the Newstan Colliery Surface Site	<p>The Strategy for the Conservation of Bats in Derelict Mines (NPWS 2001) will be followed. In addition:</p> <ul style="list-style-type: none"> A 50 metre exclusion or non-disturbance zone will be maintained around Bat Alley consistent with advice sought from RPS (2014a). The Project design incorporates light and sound barrier walls around the proposed ROM coal stockpile in this locality.
Mitigate impacts to threatened species at Newstan Colliery Surface Site and Hawkmount Quarry REA	As part of the detailed design phase for the upgrade works at the Newstan Colliery Surface Site, Northern Coal Services will ensure that that proposed disturbance footprint is positioned to minimise removal of <i>T. juncea</i> (the Project includes removal of 376 clumps of <i>T. juncea</i>).
	As part of the detailed design phase for the establishment of the Hawkmount Quarry REA, Northern Coal Services will ensure that that proposed disturbance footprint is positioned to minimise removal of <i>G. parviflora</i> subsp. <i>parviflora</i> (the Project includes removal of one stem of <i>G. parviflora</i> subsp. <i>parviflora</i>).
	As part of the detailed design phase for the establishment of the Hawkmount Quarry REA, Northern Coal Services will ensure that that proposed disturbance footprint is positioned to avoid removal of any <i>T. juncea</i> .
Offset the ecological impacts of the Project	<p>Northern Coal Services will implement the following compensatory measures to offset the potential ecological impacts of the Project:</p> <ul style="list-style-type: none"> Prior to disturbance activities at the Newstan Colliery Surface Site, develop and implement a <i>T. juncea</i> translocation research program to build on the current knowledge regarding translocation of this species. The 376 clumps of <i>T. juncea</i> within the proposed disturbance area at Newstan Colliery Surface Site will be translocated and monitored in accordance with the proposed research program. Within 6 months following completion of vegetation clearing at the Newstan Colliery Surface Site and/or Hawkmount Quarry, nest boxes will be installed at a ratio of 1:1 (i.e. one nest box for every habitat hollow removed). The design and installation of nest boxes will draw on the information obtained from the five year research program undertaken by Centennial Mandalong into the utilisation of different nest box designs and aspects. Within 12 months following development consent, fund the development and implementation of a research proposal to investigate genetic patterns among and within populations of <i>T. juncea</i> from a range of habitat types. The benefits of this research will assist in determining whether conservation and offsetting actions can protect the genetic diversity of <i>T. juncea</i>.
Aboriginal Heritage	
Monitor, mitigate and manage impacts to Aboriginal heritage sites	The scarred tree (RPS COAL LOG 1; AHIMS 45-7-0324) identified at Hawkmount Quarry will be clearly identified and avoided by proposed surface works. If any surface works are to occur within 100 metres of this site, a suitable buffer zone will be established to cordon off the area and avoid unintentional impact.
	If further Aboriginal site(s) are identified in the Project Application Area, any surface works in the vicinity will cease and a suitably qualified archaeologist and representatives

	from the registered Aboriginal parties will be contacted in order to ensure appropriate assessment and management.
	All relevant Northern Coal Services employees and contractors will be made aware of their statutory obligations for Aboriginal heritage under the NPW Act 1974 as part of the site induction process.
Non-Indigenous Heritage	
Minimise impacts to items of European heritage	If further non-Indigenous cultural heritage material is in the Project Application Area, any surface works in the vicinity will cease and a suitably qualified heritage consultant will be contacted to assess the item. Northern Coal Services will adopt the appropriate mitigation measures, as provided by the heritage consultant, before recommencement of work.
	All relevant Northern Coal Services employees and contractors will be made aware of their statutory obligations for non-Indigenous heritage under the Heritage Act 1977 as part of the site induction process.
Air Quality	
Mitigate air quality impacts at Newstan Colliery Surface Site	In order to achieve the air quality criteria at receptors surrounding the Project Application Area for the life of the Project, an Air Quality Management Plan will be prepared taking into consideration the commitments made in this EIS and relevant consent conditions.
	Northern Coal Services will commit to automating the train loading operations aspect of the Northern Coal Logistics Project once it is proposed to export 5.5 Mtpa. Water sprays will be installed on the transfer point of the train loading bin so as to minimise dust generation during the loading of trains.
	Northern Coal Services will undertake regular reviews of the air quality model for the site as the volume of coal increases.
	Northern Coal Services will install automation in the coal handling operations between the CHPP and the rail loop stockpile as required to maintain compliance with air quality criteria and to meet operational efficiency requirements. Automatic water sprays on all new transfer points between the CHPP, the new product coal stockpile and the rail loop stockpile will be installed.
Monitor air quality impacts from the Project	<p>Northern Coal Services will continue the existing air quality monitoring program at Newstan Colliery Surface Site and Cooranbong Entry Site, which comprises:</p> <ul style="list-style-type: none"> • Newstan Colliery Surface Site - monitoring of dust deposition, TSP, PM10 and PM2.5; and • Cooranbong Entry Site - monitoring of dust deposition, TSP and PM10.
Noise	
Reduce noise emissions from the Newstan Colliery Surface Site	In order to achieve the noise criteria at receptors surrounding the Project Application Area for the life of the Project, a Noise Management Plan will be prepared taking into consideration the commitments made in this EIS and relevant consent conditions.
	The proposed new CPP will be clad with noise attenuating panels.
Visual Amenity	

Minimising visual impacts from the Newstan Colliery Surface Site	New infrastructure items will be dark in tone and constructed of non-reflective materials.
	All new lighting installations will be low level intensity lighting comprising individual and directional spot lighting design to minimise light spill.
Dangerous Goods	
Provide safe storage, handling and disposal of dangerous goods	Within six months following development consent, Northern Coal Services will update the existing Newstan Colliery Emergency Management System and Mandalong Mine Emergency Management System to cover the Project. These updates will take into consideration the relevant requirements under the impending Workplace Health and Safety (Mines) Act 2013, commitments made in this EIS and all relevant consent conditions.
Bushfire	
Reduce risk to Northern Coal Services infrastructure and local landholders' properties from bushfire	Within six months following development consent, Northern Coal Services will develop a single consolidated Emergency Management System for the Project to incorporate the findings and conclusions of the bushfire risk assessment (Kleinfelder 2014), the commitments made in this EIS and all relevant consent conditions.
Post-Mining Closure and Rehabilitation	
Rehabilitate the Project Application Area to agreed final land uses	<p>Within five years of Project completion, Northern Coal Services will prepare a detailed Closure Management Plan with the aim of rehabilitating the Project Application Area to create a landform with land use compatible with the surrounding land-use and/or the pre- determined and agreed beneficial land use(s). In addition to addressing the removal of surface infrastructure, the Closure Management Plan will include:</p> <ul style="list-style-type: none"> • Rehabilitation of disturbed areas to a condition that is self-sustaining or where maintenance requirements are consistent with an agreed post-mining land use; and • Final rehabilitation success criteria.
Social	
Continue to engage with stakeholders	Northern Coal Services will continue to implement the Stakeholder Engagement Strategy for the Project.
