

28 May 2025

Tim Mead  
Development Director  
Someva Renewables

via email: [REDACTED]

Dear Tim,

**Pottinger Wind Farm (SSD-59235464)**  
**Questions on Notice**

I refer to the above State significant development application which is currently before the NSW Independent Planning Commission (**Commission**) for determination.

Following the Commission's meeting with the Applicant on 26 May 2025, the Commission is seeking a response on the following matters:

1. The Environmental Impact Statement and Response to Submissions report state that the project would generate sufficient energy to power around 830,000 homes per year. Please explain how this figure has been calculated.  
  
The Commission notes that, given the Department's Assessment Report states that the project would generate sufficient energy to power around 593,000 homes per year, the Commission has requested the same information from the Department.
2. The oversized and over-mass (OSOM) vehicle transport route from the Port of Adelaide is proposed to travel through the towns of Wilcannia and Ivanhoe, among others. What consultation has been undertaken with the Central Darling Shire Council and communities of Wilcannia and Ivanhoe about traffic and road impacts?
3. What would the annual contribution amount be to Hay Shire Council and Edward River Council if the project is staged in accordance with the Applicant's current access rights (832.1 MW)?

The Commission requests that the Applicant provide a response by **5pm on Monday 2 June 2025**.

Should you require any clarification in relation to the above, or wish to discuss further, please feel free to contact Jane Anderson at [REDACTED] or [REDACTED]

Yours sincerely,

Stephen Barry  
Planning Director
