

To the Independent Planning Commission,

My name is [REDACTED] and I have retired we have 2 Grandchildren and I am deeply concern about the climate impacts of any expansion of any coal mine in NSW. We have seen the impacts of climate change, Victorian flash Floods 10 cars washed in the ocean, Record heat waves this summer, Queensland floods. Over heated oceans coursing Algal Blooms killing wildlife. Loss of species in local areas. I my local park we have seen many birds disappear this summer.

I am writing to voice my concerns over the Yancoal's proposed expansion Moolaeben OC3 Coal mine near Mudgee NSW.

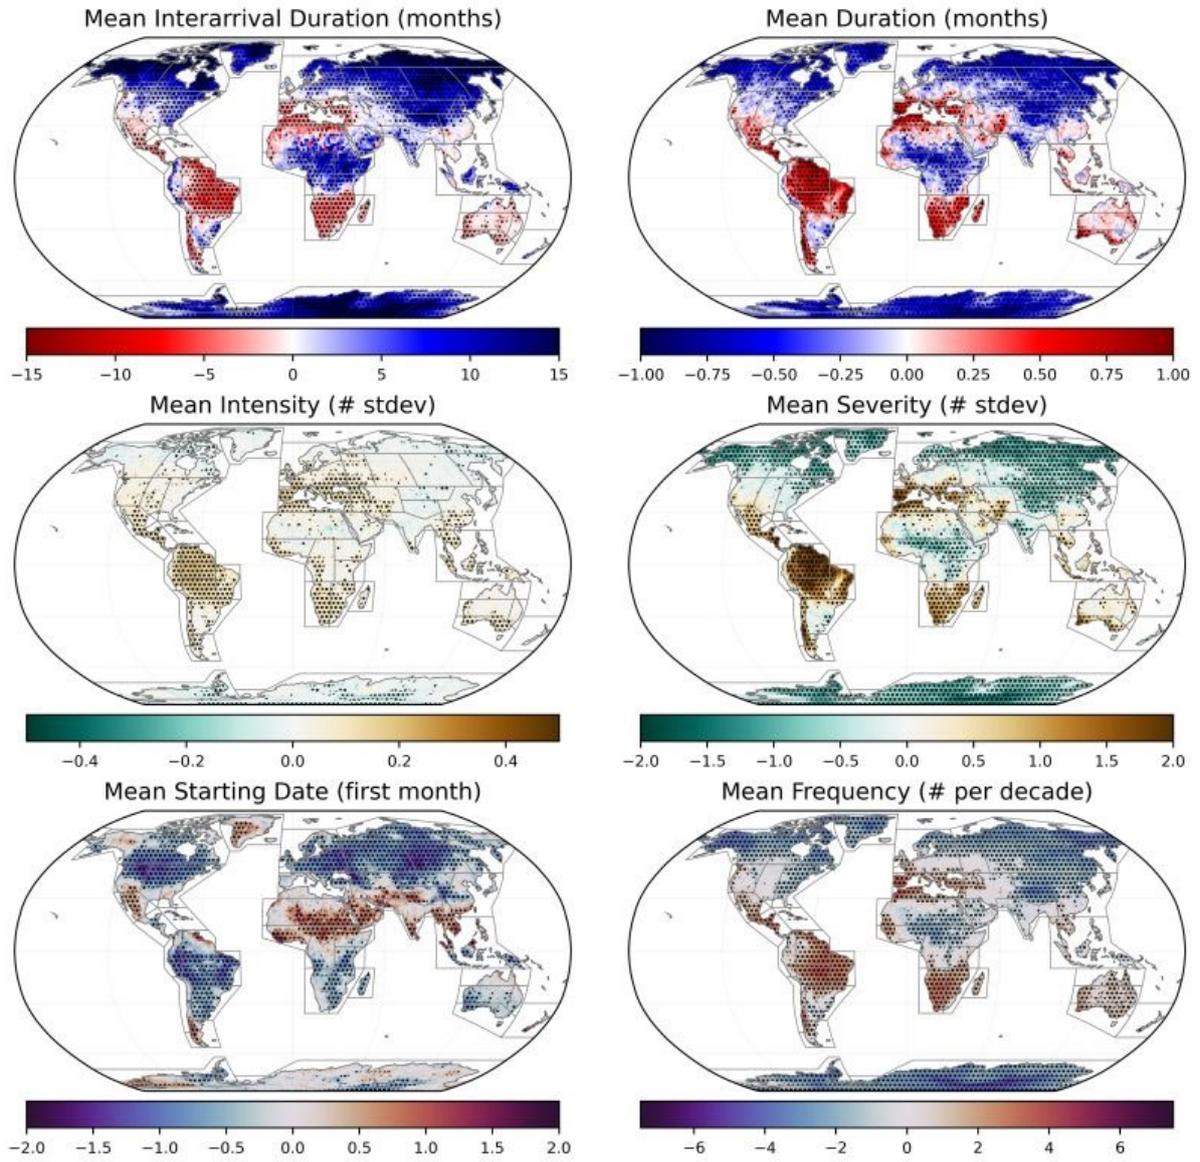

Carbon Dioxide and methane are a record high amounts in the Atmosphere. I am concerned over the loss of habitat for Koala, gliders and rare bird habitats.

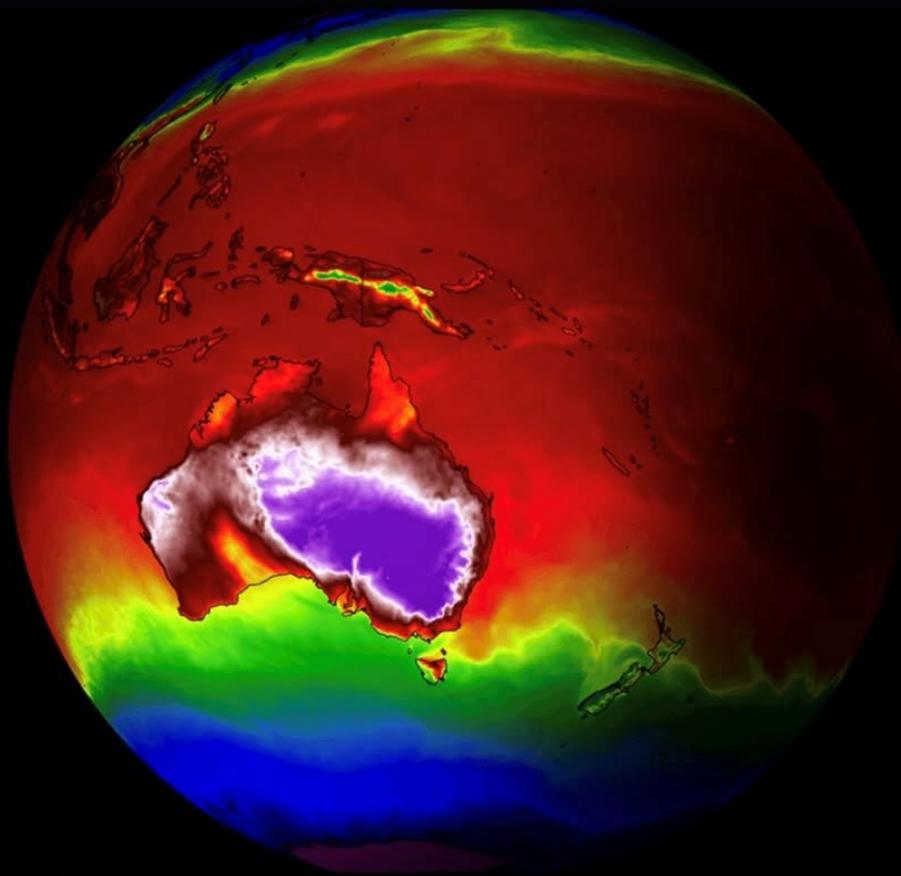

Groundwater will be affect and we are losing water everywhere.

CCPI 2025

AMJJAS changes in SPI3 MDE properties - SSP2-4.5

**Australia is trapped under
a heat dome, pushing
temperatures to
122°F (50 °C)**

We can't keep exporting coal to be burnt overseas.

I am urging the Independent Planning Commission to reject any expansion plans.

Thank you for considering my submissions.
