

DA/17/1092

I object strongly to this DA cemetery and crematoria based at the front door to Wallacia Village yes not in our backyard in our front door the gateway to our Village our homes the place we choose to live.

I find this state government are hypocrites they are insistent on demolishing two stadiums in Sydney at the expense of \$2.3 Billion and at the same time ripping out our only sport facility in Wallacia and turn it into a graveyard and crematorium let this be their political grave yard

The traffic report is gravely inadequate and should be shredded it does not include the new sub divisions in Silverdale and Wallacia did they include future development with the airport and the approval of two other cemeteries in Greendale

All this without any consultation with the community we feel the state government have ambushed our homes our lives our future this Major Commercial Development is unacceptable in the centre of our Village

The public meetings with Peter O'Meara and the Urbis group were a fear tactic scam.

This DA can not happen!
