Development Application: 17/1092

I wish to advise I strongly object to the Development of Wallacia Golf Course (Lot 2 DP 1108408 & Lot 512 DP 1079728).

I oppose the proposal of a Cemetery & Crematorium within our community for many, many reasons however to name just a few:

- Environmental Issues - pollution
- Health risks - it has been documented women living near incinerators have a higher risk of having a baby with spina bifida or a heart defect. It also found an increased risk of stillbirths among women who lived close to a crematorium.
- One of only two sporting facilities available to our community, the other being bowls. I want to continue to golf at Wallacia and have our younger generation continue to learn/play golf also.
- Traffic congestion - the road system cannot cope with current requirements, let alone that which is planned by this development
- Leachate - Jerry's Creek runs through the golf course and straight into the Nepean River.
- Flooding - the golf course and surrounding areas flood therefore the above is a serious concern.

- Decline in real estate value with a cemetery in the centre of town
- The community does not want a cemetery.
- Other areas on outer areas of suburbs more suitable than the centre of our community

Please note my strong objection to this DA.
