Dear Panel,

I am writing to object to a cemetery being built on the Wallacia NSW Golf course. I have concerns about the impact on my home from the construction, and crematorium operation. I have concerns for the long term ground water runoff and leaching from so many gravesites. Park Rd is a dangerous road and funeral processions will complicate this danger. The Wallacia golf club is a social outlet for many in the community and a lot of elderly living in nearby aged accommodation.

Wallacia has the golf course as its only sporting grounds and is owned by government. We have no soccer, netball, cricket, football, tennis etc for the children and need to retain this historic golf course, the first to allow women members in Australia.

There are many properties in the surrounds of Wallacia that could be purchased and turned into a cemetery without

destroying the only sportsground in the community, and 88,000 plots @ \$5000 = \$440mil providing ample financial return regardless what is paid for the properties.. Wallacia will be negatively impacted by the Badgerys Ck airport, and this seems to be just a kick while we are down following the Airport blow. Would you please help us by supporting our communities objection to building a cemetery on the Wallacia Golf course crown land. We can live with the airport, but please don't tear the heart out of our village.

Kind regards
