Subject: BYLONG MINE GATEWAY CERTIFICATE
Date: Friday, 2 August 2019 3:40:06 PM

Dear IPC,

I wish to comment on the expiration of KEPCO'S Gateway Certificate for the proposed Bylong coal mine. The sound reasons for the issue of a Gateway Certificate are even more important than when the Certificate was originally issued.

Climate change has continued it's development, the drought affecting NSW has worsened and anti coal sentiment has increased.

The proposal to mine in this area has always been outrageous, the guaranteed permanent damage to the irreplaceable soils in the

Bylong Valley cannot be allowed.

KEPCO must at least be required to seek a new Gateway Certificate.

DEREK FINTER
