

Re Bylong Coal Project SSD 14_6367

Expired Gateway Certificate

Mudgee District Environment Group is asking that this certificate not be renewed.

This mine should not go ahead.

Kepeco has already failed 11 of 12 conditions even when the certificate was out of date. This demonstrates that they are not fit to proceed.

This proposed mine will ruin Biophysical Strategic Agricultural land "BSAL"

The Water impacts will be a disaster.

Yours Sincerely

Phyllis Setchell

Chairperson MDEG
