

Exploration Licence Program

Ulan plans to drill 71 holes in the exploration licence area EL8687

- Exploration Drilling proposed to commence mid year 2019- 6 holes planned, negotiations for land access have commenced (a standard land access agreement template is negotiated with each landholder)
- There will be several trucks including the drilling rig and more mine spec light vehicles in the area during drilling
- Approximately 35 drill sites planned for 2020
- Approximately 30 drill sites planned for 2021

The location of drill holes for 2020 and 2021 is not confirmed. Negotiations for land access for these holes will commence approximately 6 months in advance of the drill program
